

We're putting a racetrack right through your living room.

ENDURO™, the spectacular new driving game from Activision®. It's going to be the toughest challenge of your driving career.

A cross-country race of endurance and skill, with more exhilarating, three-dimensional effects than you ever thought your Atari® 2600™ Video Computer System™ could produce.

Amazing graphics and sound effects. Incredibly responsive controls. And an extra test unlike any you've ever experienced: constantly changing road conditions –

everything from hot desert to snow and fog – as you drive through daylight and pitch darkness.

But be warned. Once you start there's no turning back. With ENDURO™, there is no finish line. Can you endure?

Join the Activision Fun Club and save £1

Regular Fun Club News magazine • Personalised membership card • And a £1 cash rebate token towards the cost of your next Activision® cartridge.

SEND THE COUPON NOW TO:

Activision Fun Club, 7 High Street, Maidenhead, Berkshire SL6 1JN.

HARRIER ATTACK!

HARRIER ATTACK

any ORIC-1 £6.95
any SPECTRUM £5.50

At last a pure machine code, super-fast, action-packed, highly addictive arcade-style game requiring great skill. This game is everything an arcade fanatic could ever hope for — with full colour graphics and explosive sound!

Any ORIC-1 or
SPECTRUM

BLASTERMIND

48K SPECTRUM £5.50

We have yet to find a more infuriating and downright rude version of a well known game. You too can have insults heaped upon you as you struggle to beat a very sarcastic opponent. Even cheating won't work. Very addictive — until you throw the computer into the T.V. screen.

The Quest of Merravid

THE QUEST OF MERRAVID

Vic 20 (16K) £7.95
Commodore 64 £7.95

The adventurer becomes Merravid, charged with the task of finding, taking and then returning the magic Firestone of the Dwarves. However, overcoming the many novel and original hazards is no easy matter. Careful and imaginative thought is required if progress is to be made and the Firestone tracked down to the lair of the Dragon of Thargon. Even then the Dragon has to be defeated and the stone retrieved. A compulsive, extremely enjoyable and very user friendly adventure.

Commodore 64

HUSTLER Written in machine code and using Sprite graphics HUSTLER takes the 64 to its limits. There are six 'pool' type games for one or two players, high scores kept and super music. See the great press reviews. **£5.99**

EXTERMINATOR Definitely one of the best arcade action games around for the 64. Shoot the worm and everything else in the garden whilst avoiding the deadly spider and swooping eagle. Machine code using high resolution and Sprite graphics with excellent sound. Beware, it's very addictive. **£5.99**

QUIZZER Set up your own educational quizzes with password protection. Ideal for home and school.

LABEL PRINTER Stores names and addresses on tape which you can recall and amend. Label size you can print is from 1 to 19 lines.

POSTER PRINTER Ever wanted to produce your own special leaflets. This program prints a special enlarged character set.

ADVERTISER Amazingly turns your 64 into a musical moving message display machine. Ideal for shops, clubs, etc.

£5.99

£5.99

£5.99

£5.99

unexpanded VIC 20

EXTERMINATOR Fast action arcade game in which your task is to destroy the worm who is out to get you. Watch out for the eagle which will pounce on you just when you think you're safe. High resolution machine code. **£3.99**

ANTIMATTER SPLATTER There is an ugly alien dropping bombs on the population. Your job is to 'zap' those bombs before they land. It's not easy though as they are falling through moving belts. Super high resolution machine code game. **£3.99**

THE CATCH This game will have you coming back for more. You must catch the falling bombs before they destroy the cities. The catch is, they're moving from side to side and faster and faster. High resolution machine code. **£3.99**

We have 13 other VIC 20 games, plus educational and business programs. Send stamped, addressed envelope for lists.

Lock 'n' Chase from Intellivision. Try finding a better maze game.

If you're looking for a really challenging video game, look no further.

With Intellivision Lock n' Chase you're in a maze of bank vaults, trying to collect gold bars as fast as you can. But you're being pursued by truncheon swinging cops. And the only way to survive is to slam the doors behind you. But beware, or you'll lock yourself in!

Lock n' Chase is just one of zillions of great games from Intellivision.

With superb graphics, challenging game play and exciting action, you'll find they take a lot of beating.

*Don't be a Nerk!
Buy Intellivision!*

MATTEL ELECTRONICS®
INTELLIVISION

FREE INTELLIVOICE WORTH \$50!
Intellivision is the only system that gives you games that speak for themselves. And right now, we're giving away an Intellivoice module (worth \$50) free with every Intellivision master component. There's never been a better time to choose Intellivision.

ORLANDO'S BACK!

ZALAGA

Aardvark Software, creators of the Ultimate Atom Games, bring you NOW

THE ULTIMATE BBC SPACE-GAME

Seated at your computer, streams of multi-coloured aliens swirl past your laser-base into formation. The first squadron appears harmless, but later waves will avenge the deaths of their comrades with increasing ferocity. To combat the swooping bomb dropping meanies, you may try to link up a pair of laser-bases and **double your fire power!** Your progress through successive phases will be rewarded by challenge stages, where large bonuses may be earned. The game builds up to a dizzying crescendo of high speed motion where instant reflexes and pure technique are your only hope of survival. . .

One or two player game • Keyboard or joystick • Sound on or off • Escape facility
• Works on all OS's and Tubes • Ten name Hi-score table • Mode 2 full colour graphics • Continuous rolling twinkling stars • Multiple missiles • Full screen action • Attractively packaged in a collectable library case • High quality cassette • Full instructions • For BBC model B or A + 32K •

Send cheques/P.O.s for £6.90 to

**Aardvark Software,
100 Ardleigh Green Road,
HORNCHURCH, Essex.**

FRAK coming soon . . .

Dungeons & Dragons from Intellivision. Leaves other adventure games in the dark ages.

Try a video game that may be smarter than you are.

Deep inside the towering mountain you're dodging the Winged Dragon's jaws as you try to snatch the Enchanted Blue crown. You've journeyed through dense forests and forbidden gates and you're half-dead from rat and snake bites. You're outnumbered and short of arrows.

Are you sharp enough to survive?

Dungeons and Dragons is just one of zillions of great games from Intellivision.

With superb graphics, challenging game play and exciting action, you'll find they take a lot of beating.

Don't be a Nerk!

RUNS ON AN ATARI 400-800 IN 16K

BY DAVID RAWLINGS

High above the planet the alien attack fleet awaits the final order to launch their deadly heat seeking missiles. Meanwhile on the planet's surface the defence system is on Red Alert. All shields are up ready to defend the cities and lasers are at the ready — preparing to blast the missiles out of the atmosphere as they race toward the gleaming spires and towers of the vulnerable cities. What will the outcome be? Will the cities be saved? Or will the alien attackers reduce them to piles of smoking rubble? only you will know. You are in charge of the defence systems which protect those all important cities. Can you save them? Play On!

fantasy

The battle could be yours.....

.....but it won't be easy!

PARTICIPATION — that is the name of OUR game. All our software contains a unique score verification mechanism allowing us to add a new dimension to computer games. Every July and January we will be publishing a ranking list of the top 1000 scorers in each game with the overall top 100 'grand masters' each receiving certificates of merit bearing their position.

September is the last month to qualify for the Black Hole championship. However, from October the sender of the highest valid score each month will win software of their own choice to the value of £50.

The Black Hole is a technicoloured confection of special effects...very demanding; magnificent graphics. (Soft)
The explosion effects are some of the best we have seen.
... (Sinc User)

Totally original game plan. Addictive, challenging and offering a complete visual experience with its animated graphics and violent explosive effects. Compatible with ALL leading joysticks.

If you are looking for something that will keep you up all night, cause you to pull your hair out, send you mad with its trickery, then you really shouldn't miss this game.
The mystery of "THE PYRAMID" won't take you a few days to solve, it will probably take you a few months.

FANTASY SOFTWARE
is available from W.H.Smiths,

Waldo the Wizard — the Game network's trademark

The cable TV revolution won't just mean more sport and soap operas beaming into your front rooms. Computer games will also be zapping down the cables to provide yet another way of getting software for your micro. **TIM METCALFE** takes a look at two cable games services which will come on-line early next year. Will cable change the face of video gaming?

PICTURE the scene. A bored family sitting around the TV, watching yet another repeat of *The Good Life*. Suddenly there's a flash of light, a puff of orange smoke and a strangely dressed being appears through the screen!

"Hi! I'm Captain Cable, defender of the viewer," says the odd visitor. "My mission is to protect YOU from TV boredom. No longer do you have to suffer the tyranny of the dreaded repeat. I can bring you the TV programmes of your dreams — and computer games too!"

Soon the family are happy and laughing again, playing the latest space shoot 'em up on their special cable games console supplied by Captain Cable. "Gee, thanks Captain," says little Bobby, "We'll never have to watch *Game for a Laugh* again!"

Well, maybe the arrival of cable television won't be so dramatic in your home, but there's no doubt that it will change the way you use your TV.

If you are lucky enough to live in an area where there is already a cable system linking your home with a "head end" station — that's where the films, games and news come from — you should be able to get a games service shortly after cable TV starts early next year.

Two major companies are going to provide a computer games service to subscribers when cable TV gets under way. W. H. Smith have come to an agreement to distribute services provided by The Games Network, a Californian company. And Thorn-EMI will be using their own cable networks to send games for popular micro-computers into your homes on their Telesoft-ware system.

The two systems illustrate the different approaches to playing games by cable. The W. H. Smith service, The Games Network, will be offered as a package to companies operating a cable system — who in turn will sell it to you the customer.

The Games Network needs a special computer to download the games, you can't just plug your own home micro into the system. This machine is called The Window and is a 64k micro custom built for The Games Network.

Subscribers to the network will be able to choose from 20 different games each month — selecting the game and playing it using The Window. Each month at least five new games will replace the least popular offerings on the system. The games are stored on a head-end computer system, which includes a fail-safe back-up to prevent any problems.

It will be a 24 hour system too — so if you want to blast a few aliens at three o'clock in the morning you'll be able to do just that! W. H. Smith say that the cost to the subscriber will be around £10 per month. They reckon that if you wanted to play as many games per month as the network will provide you'd need to spend around £100 on tapes or cartridges.

Any of you having ideas about copying the games from the network system had better think again. The Window has built in security systems to prevent you doing it! There's no way you can save your favourite game, you have to pay as you play.

Initially The Games Network will use games written in the U.S. but W. H. Smith say they want to gradually introduce British written software into the system.

The Games Network was tested in California and started in earnest in September this year. In the States the network recommends that cable companies charge subscribers \$49.95 to install the computer. The cable company keeps \$15 of the installation fee and the customer gets \$20 back when he ends his subscription.

Thorn-EMI hope to hold several of the cable franchises when the Government decides later this year. They will

use their Telesoftware system to distribute games already available on their software catalogue.

The main difference is that unlike The Games Network, subscribers will be able to use their own micro. The games will download onto any of the popular home-computers including Spectrum, Atari, Texas, Vic-20, Commodore 64, BBC and, in the near future, the new Electron.

Subscribers will need a TV top adapter and Thorn-EMI are developing special cartridges for cartridge based machines to allow communication between the Telesoftware system and the computer.

The subscriber simply calls up a menu page, selects another page detailing games for his or her machine and then chooses a game and downloads it.

Telesoftware hope to have up to 100 games on their system, again being monitored for popularity so changes can be made to the catalogue.

They also plan to use other software other than that marketed by Thorn-EMI.

They say they went for a cable distribution system rather than a telephone line system — like Micronet — simply

DIAL A VIDEO GAME!

THE days of buying your software on cassette are numbered. The latest way of obtaining programs is called telesoftware. The tele part means the same as in television and telephone — Latin for “from far away” — which is the idea of telesoftware.

Instead of buying a program on a tape or cartridge you can now receive it, transmitted at the speed of light from a computer far away, into your own micro.

There are two ways of doing this. One is to transmit the program down a wire using either a specially installed cable or the existing phone line.

The alternative is to broadcast the software through the airwaves as a radio signal and let your micro decode it when it arrives.

Both systems are currently available and although they both allow you to “download” programs, there are also many differences between them. Let me

To access Ceefax on your BBC you will need to buy the Acorn Teletext adaptor. This will cost you £225, for which you get the box of tricks itself, a ROM which you can install yourself without invalidating the guarantee, and a glossy 73 page manual.

Because the data from Ceefax is broadcast over the airwaves, communication is only one way. You'd need a pretty big transmitter in your garden to talk back!

This means that you can't, for example, say “send page 147”. So what happens is that the Ceefax transmitter sends each page for about a fifth of a second and then sends the next and so on. Then it starts again from the beginning.

You tell the Teletext adaptor which page you want and the machine then waits for that page to come round, “grabs” it from the system and displays it on screen for as long as you wish.

Although there is no real limit to the number of pages which are available on Ceefax, it is kept at around five to six hundred to keep access times as short as possible. One complete cycle takes 15 seconds.

It's not as simple as that, though. Each page, of which there are a couple of hundred, can have up to 99 sub-pages which are extensions of that page. So a screen which is labelled 147 5/8 means page 147, sub page 5 of 8.

The computer cycles through the pages transmitting all the sub page 1's, then cycles again transmitting the 2's and so on. So if you're looking for a certain frame it may take time. If you are downloading a 10-page Basic program though, and the first page the machine finds is sub-page 5, then it will load from there and pick up the first four frames when they come round.

This works on Basic programs only — if you are waiting for a text or machine code file then the chances are that it will have to wait and start from the front page.

The most important and useful difference between Ceefax on a special TV and Ceefax on a BBC micro is that a Basic program on a BBC can access pages from Ceefax as if they were stored in the computer's memory and then manipulate them.

For example, there is a program which asks you to choose a menu for a dinner party from a wide range of ingredients. When you have chosen, the computer looks up the “today's food prices” page on Ceefax, extracts the prices of the items chosen and shows you what you would expect to pay for the meal.

If the program is used again the next day, then new prices will be used.

BY CABLE

because of the speed of downloading and number of games that can be stored on the head end computers.

Both W. H. Smith and Thorn-EMI are aware of the tremendous potential that cable systems have for testing out new games and discovering if they are winners or not. This would save a lot of time and money and popular games would soon find space on the packed software shelves.

The Government has invited applications for the first pilot cable franchises in August. By November this first dozen should have received the green light and by next year should be in operation. Thorn-EMI have applied for franchises in Scotland, Coventry and Leicester.

But many thousands of homes already have access to cable TV so they could be receiving a games service before the rest of the country.

It remains to be seen how popular playing-by-cable will be. Will micro owners give up buying software? Or will cable games be able to exist side by side with existing outlets for software?

Many experts are already predicting that cable TV will flop badly in this country. They reckon that people won't want to pay to watch — or play for that matter. But it's really up to you isn't it?

explain . . . Both systems are very new. The newest, though, is run by the good old BBC and is currently available only for the BBC model B micro.

This telesoftware system is the latest addition to the BBC's Ceefax service which puts screens of written information on your television.

Until now there was only the normal information which everyone needs for their daily life, like the current share prices and today's price of fillet steak.

What the BBC had been dreaming of was to produce a Ceefax adaptor to enable BBC micro users to access Ceefax instead of the normal way which involved buying a special TV set for around £100 more than a normal one.

It was thought that, if the BBC micro could receive pages of information then why couldn't programs be transmitted on Ceefax pages and loaded into the micro? Well now they can.

This is the BBC's entry in the telesoftware stakes and there are currently around six to eight programs which you can download, as well as having full access to the rest of the Ceefax database.

You can also look at ITV's teletext service which is called Oracle although the BBC don't mention this. Anyway, Oracle doesn't have telesoftware on its pages.

Ceefax is not seen as being a long term software library, and there will only be about seven or eight programs available at one time. These will be changed every 14 days. There will also be software to tie in with schools television broadcasts, and this will be changed weekly to coincide with the programmes.

The other way of receiving telesoftware is via direct wire link between your micro and the computer which is sending the program.

To avoid laying extra cables, most of these systems use the existing telephone line. Such a system is Micronet 800.

Micronet (to its friends) is a large database of information held on an even larger database called Prestel. Prestel is run by British Telecom and owing mainly to the cost of the hardware needed, had only about 10,000 members as of last year.

These were mainly business users. Then someone had the idea of opening an area of Prestel especially for micro users, with the micro doing most of the work of decoding the signals from the phone. All that would then be needed would be a simple piece of equipment to link the micro to the phone.

This system is called Micronet and began operation in April of this year. It starts on page — you guessed it! — 800 of Prestel and has space for around 30,000 frames.

Membership of Micronet also gives you access to the rest of Prestel, which totals some 250,000 pages. Some of these are for private use by certain companies but most are freely available to look at. Micronet also offers telesoftware, with a range of programs which can be downloaded via the phone into your computer.

Transmission on Prestel is two-way. As well as being sent information, you can also send data from your set to the Prestel computer.

This means that you can request a particular page and Prestel will transmit it to you.

Data from Prestel to you is transmitted at 1200 baud, which is the same speed as loading from cassette. There is hardly any delay between pages on longer multi-frame programs.

Because you are on line to a live computer when using Micronet, there is a lot more available to you besides telesoftware. But for the same reason, the computer knows who you are and what telesoftware you are downloading and what other pages you are looking at.

So every three months you receive a Prestel bill, as well as a severe shock when your phone bill arrives!

Micronet can currently be used on the Spectrum, BBC, Apple and Tandy. Link-up for more computers is planned.

The BBC Teletext adaptor (above) and Spectrum with Micronet modem.

There are at least a hundred free programs on the system for each computer, which can be downloaded for the cost of a phone call. There are also programs which will cost you money. These are either written by contributors or by professional software houses.

You can download the latest releases from the major companies more cheaply than ordering the cassette. However, if you then have trouble saving the program on cassette you've lost your money.

These charges go on your Prestel bill, as does your Micronet subscription. About 80% of Prestel pages are free.

There is also a charge for being connected to the Prestel computer. During office hours your bill increases by 5p a minute, but at other times it is free.

These are the two database/telesoftware systems currently available in this country.

To connect to Micronet costs be-

tween £60 and £150 for the modem to link the computer to the phone, depending on your micro, BBC is the cheapest.

You also need to register as a Prestel user which costs £5 a quarter, and as a Micronet user which is £8 a quarter.

Then there are telephone charges and also page charges, although these can be avoided.

The BBC Teletext adaptor costs £225. Once you have paid for it then there are no other charges at all. You can download programs and access the entire Ceefax database as often as you like.

The entire database, though, is only 500 pages in length while Micronet alone has 30,000. Prestel has nearly ten times more. The Prestel and Micronet system is available 24 hours a day, seven days a week. Ceefax is available only while the BBC transmitters are active: from around 6.30am to 1am.

Both systems are quite accurate in the transmitting of data. The telephone line is quite acceptable for Micronet, although the BBC recommends an outdoor aerial for Ceefax reception, unless you live next door to a transmitter.

Micronet is a two-way system. You can send data to Micronet, and even send messages to a fellow subscriber, which will be waiting for him or her when they next use Micronet.

A home banking section has just been introduced whereby you can handle your account, pay bills and see your statement while sitting at home watching TV!

Transmission of Micronet pages is at 1200 baud and, like Ceefax, you can fit about 1k of program on a frame.

Although Ceefax transmission is faster and can download a single-frame program in hardly any time at all, multi-frame programs take as many 15-second cycles as there are frames.

I watched a 20-page program loading. It took six minutes. The maximum program size which you can download is governed by the amount of RAM which the micro uses to process the telesoftware and other data.

Installing the telesoftware ROM in a BBC reduces RAM by around 1.5k, whereas the Micronet-handling software takes 17k of the 32k available to a BBC B user. (One of the reasons why Micronet won't run on a model A).

So now it's make-your-mind-up time. You can either get into the telesoftware habit or carry on sending off for cassettes.

If you'd like to get into this new technology and have a BBC micro then you're lucky enough to have a choice.

If you've got a different computer then you can either join Micronet or hope that someone will make a Teletext adaptor for your machine.

BY ROBERT SCHIFREEN

CHOOSING A HOME MICRO

Choosing a home micro can be a daunting task to the newcomer, and with an ever increasing number of micros emerging on the market, even up-grading, say, from a ZX81 can be a risky and expensive exercise if the wrong decision is made. It is important to look at the real facts and specifications, and check exactly what you get for your money before choosing your micro-computer system.

THE PITFALLS

"DON'T LET THE ADD ONS ADD UP"

A number of large companies are offering packages that seem to be good value and low cost. These offers usually have a hidden sting inasmuch as the essential accessories such as connection leads, peripherals and software often carry very high cost premiums. e.g. software for low cost hardware usually costs between £29 and £49 for a ROM cartridge!!

CHECK THE QUALITY OF THE PRODUCT.

Raw materials are now an area where corners can be cut, and shoddy workmanship during 'building' can effect the 'up-time' of your unit. Areas to watch out for are unreliable edge connectors, corrosion and poor quality P.C.B.s. Low quality components and bad design will seriously effect the reliability of the end product, and can lead to false economy.

DON'T BUY A GAMES MACHINE

Unless you want just games and nothing else! With a games computer you are limited. Some computers, however, have the advantage of both games facility plus the whole world of computing to explore, as your interest and skills develop. A real computer system will allow you to expand your knowledge of the Hi-Technology world, and help earn its keep with its added uses in the field of education, communication and home business use.

SOFTWARE

Make sure the system you choose has a growing library of support software, to enable you to realize the full potential of your machine.

KEY POINTS TO LOOK FOR

● High Resolution Colour

In general most home computers have a poor graphics resolution (or detail). Check on the vertical and horizontal resolution in graphic mode and multiply the two numbers together. If the result is less than 35,000, then the graphics can hardly be considered high resolution. Without high resolution graphics displays such as those used in games tend to be "Chunky" in appearance.

● High Quality Sound

Some computers claim to provide a sound channel when in reality all that can be found inside the computer is a small buzzer controlled by electronic pulses. At the very least a sound facility should provide more than one channel and a raise channel as well (for gun shot effects in games for example). The best systems also provide envelope control of the sound channels to produce very sophisticated effects; very important for generating music. Also look for the ability to connect to external amplifiers.

● Keyboard

For accurate entry of programs and data into a computer it is important that the keyboard has a good tactile feel in operation. Coupled with acoustic feedback the user is fully aware when the computer has accepted his/her actions. Also of importance in a keyboard is layout. A standard computer keyboard layout will familiarise the user with the vast majority of computers used in the world of business and professional applications; very important if the purpose of purchasing a computer is educational.

● RAM

One of the most important features of a computer is the amount of RAM, or memory, included. In general the more powerful and exciting a computer program is the more RAM it requires. But take care, all computers are advertised quoting the total RAM used in the system. Computers use up a great deal of their own RAM for storing essential data and particularly in supporting the graphics display and the CPU. If it is less than 32K think again, is it enough?

● Computer Language

It is too difficult to program a computer in its own binary language so high level languages are used, the most popular being BASIC. However, there are a number of BASICs, some being very different from the rest. A de facto standard in the computer industry is Microsoft BASIC. Learn this one and you will be able to program in the majority of computer BASICs; such an important point if a home computer is to be used to educate your children to face the technology of the future.

● Expansion

As your interest and knowledge of computing grows, you will need a

Choosing the right system carefully will save you from throwing your money away. Check full specification, plus peripherals and software prices, before you buy. Preferably choose a Real computer system that can expand to meet your needs.

computer system that will grow with you; able to accommodate Printers, Disk-drives, Joysticks, Communications Modem, and Colour Monitor, as well as produce HI-FI sound effects.

● Software

The computer you choose should have a growing selection of utility

software to make the most of its capability.

Remember, computing is here to stay. You can't learn to compute on a toy, or a device which does not behave like a real computer.

In short, look out for a computer which offers all the points above, and you will be sure of getting the best value for money.

To find out which company offers you the right choice, with:-

- Good value, high specification, quality micros.
- A quality, 4 colour, plain paper printer/plotter.
- Communications Modem.
- Micro Disk Drives.
- Comprehensive and growing range of software

TURNOVER... ➔

ORIC-1

The Growing System

ORIC 3" MICRO FLOPPY DISK DRIVE

Coming soon the incredible new 3" Oric Micro Drives. Small size, Compact, High precision disks with storage capabilities from 100K Bytes to in excess of 1 Megabyte unformatted. With their own built-in power supply, these easy to use units will add big system capability to your home micro.

ORIC MCP 40 COLOUR PRINTER/PLOTTER

The Oric Colour Printer is quality engineered to provide 4 colour hard copy on plain paper, with superb graphics and text capability, printing either 40 columns or 80 columns. It prints in red, green, black and blue, onto a 4½" width standard paper roll. With a print speed of 12 characters a second, the MCP 40 comes with its own power supply and all necessary leads to connect straight into your Oric or to any standard Centronics interface.

This superb printer represents excellent value at just **£169.95 including VAT.**

ORIC PRODUCTS INTERNATIONAL LTD. COWORTH PARK, LONDON ROAD, ASCOT, BERKS.

The right choice for real computing

ORIC-1

Before making your final choice, check any other home micro in the same price bracket, against the incredible specification of the ORIC-1.

● Quality of build and materials		● Real computer keyboard layout and moving keys	
● Superb styling / Full colour display		● High Resolution colour graphics 240 x 200 pixels	
● Choice of 16K or 48K RAM		● Real computer language programming – Basic/ Forth	
● Latest design technology and circuitry		● Teletext/Viewdata compatible graphics (28 rows x 40 characters)	
● Real sound – 8 octaves plus Hi-Fi output		● Cassette Port & R.G.B. output.	
● Centronics printer interface		● Fully supported and growing software library	
● Colour printer / Disk Drives		● A fully expandable system for home, education & small business use	
● Communications Modem		● Full range of peripherals to support your system...

Arcade Action for Spectrum and ZX81 16K, 48K

ELEKTRO STORM

ELEKTRO STORM

Earth is under attack from wave after wave of intergalactic missiles – your mission is to blast them out of the sky with your laser cannon before the whole human race is wiped out.
SPECTRUM 48K 5.95

HOPPER

HOPPER

Help FERGUS and his friends across the highway avoiding the traffic, and then over the treacherous river on the backs of turtles and logs to the safety of the lilly pond. Features include: 6 lanes of traffic, diving turtles, crocodiles & flies.

ZX81 16K 3.95
SPECTRUM 16K 48K 5.95

LIGHT CYCLE

The MASTER CONTROL PROGRAM has ordered you to race your light cycle on the infamous grid. This is an incredibly fast, adrenalin pumping game that is very addictive. There is an option to race against either another player or the computer – but we warn you its very very good!

SPECTRUM 16K 48K 5.95

MAZE DEATH RACE

Drive your 500b.h.p. racing car around a giant maze (9 times the size of the TV screen on the ZX81 version, 32 times for the spectrum). Watch out for the hazards – oil, ice, fallen rocks etc. Not the least of your worries are the chase cars also

in the maze – one touch with these means instant death!

ZX81 16K 3.95
SPECTRUM 48K 4.95

PANIC

"It must be a nightmare" he screamed as he ran around the maze of floors, desperately climbing ladders to different levels in a vain attempt to evade the monsters.

He had only his neutron hammer to dig holes for the vile creatures to fall into, but even then he had to repeatedly hit them before they dropped to their deaths. As if that wasn't bad enough, the oxygen supply was running out!

SPECTRUM 48K 5.95

CHEQUE OR P.O. TO RS.S.452 STONEY STANTON RD. COVENTRY CV6 5DG.
INSTANT CREDIT CARD SALES TEL (0203)667556.

LIGHT CYCLE

MAZE DEATH RACE

PANIC

KRAZY KONG

Can you rescue Jane from the evil clutches of KRAZY KONG? Fight your way through three screens of fire balls, barrels and conveyor belts to the top of the girders and save the damsel in distress. Entirely written in machine code to give super fast arcade action.

ZX81 16K 3.95
SPECTRUM 48K 5.95

Write to me at Bug Hunter, Computer and Video Games, Durrant House, 8 Herbal Hill, London EC1R 5EJ. Or 'phone me on 01-278 3881.

JETPAC — ULTIMATE

Those nasty little bugs don't just confine themselves to listings from magazines you know; they've been spotted recently happily living in many peoples copies of Jetpac, from Ultimate.

We've been getting quite a few calls saying that when trying to gain a massive score of Jetpac to enter our hall of fame contest the program seems to crash when the score gets to about 120,000. I haven't been able to try this myself as I can only manage just over 40,000 but I am assured that it does happen.

I have spoken to the Ultimate people and they said that they had never heard of such a bug. However, they did say that they will exchange your cassette of Jetpac if you think that it is faulty so the best thing to do if you suspect your cassette is to return it to Ultimate.

ARCADIA — IMAGINE

Another problem with professional software comes with Arcadia from Imagine, which also runs on a Spectrum.

Tudor Costigan wrote in to say that his spectrum crashed with an out of memory error at line 10:10 while he was playing Arcadia.

This occurred at level 244 with a score of 235,301. If anyone else has this problem, or can get anywhere near level 244, then let me know.

DRAUGHTS — ATARI

Thanks to everyone who wrote in to help me with the problem in our Draughts listing from July's issue. When typing the program into an Atari, line 109 would not fit as it was too long by four characters.

I have since discovered the solution so I award myself £5 for the following tip: you can set the left and right margins on the Atari by poking location 82 and 83 respectively.

Normally the left margin is set to four but to enter line 109 (and a couple of others) it is necessary to set the margins to allow a longer line. To do this, type POKE 82,0:POKE 83,39 <return> before typing in the program. If you have a partly typed copy on cassette then load the tape, type the POKES and then correct your copy and resave it.

VARIABLES ON THE ATARI

Here's a tip for all Atari owners. This program occupies just 245 bytes on an 800 or 400 machine and will print out the values of all the current variables and also the total number of variables used.

To use it, type GOTO 5 and not RUN, otherwise you'll clear all the variables from the machine!

```
5 Graphics 0: POKE 752,1
10 X=2048:Y=0
20 IF PEEK (X)>90 THEN PRINT
CHR$(PEEK(X)-128):X=X+1:GOTO
20
30 IF PEEK(X)<48 THEN PRINT:PRINT-
"THERE ARE ".Y." VARIABLES."END
40 PRINT CHR$(PEEK(X)):
50 X=X+1:GOTO 20
```

If an open bracket character appears after a variable then it means that it is an array. Credit for this masterpiece goes to Guy Coleman from Stratford, London, E15, as does a cheque for £5.

VIC — QUEST — VIC-20

Our listing for the Vic in September's issue was Vic Quest, which worked perfectly when I tested it on our Vic. Our printer, though, was in need of a new ribbon which caused some difficulties with printing. We're saving up for a new ribbon, but in the meantime these are the places where you may have found your vision blurring:

Listing 1: line 1180 The 3 gosubs are 100, 150 and then 100 again. Line 1250 ends with POKE 633,131.

```
In listing 2:
980 V+1, 110
1000 X=11
1110 DEF FNR(
1250 IF E=33
1300 Z=P/20+1... POKE 8121+B,32
1900 Z=P/50+1
3070 ... F*22,41
3080 F=7703
3500 A$(F,1))+140
3520 POKE V,G*3
```

TURTLE HOP — TEXAS

In Turtle Hop, from September's issue, we economised on space by removing a couple of lines from the program. These were only REMs, which explains the non-existent line 3470. You can cure your turtle by adding line 3470 REM.

The monthly dose of Texas advice comes this time from Mr W. Locksmith from Upton, Chester.

He suggests the following improvements to Turtle Hop from September, to make the program run continuously instead of waiting for a key to be pressed.

This, I am told, makes the game a lot harder to play, so if you think that your are a grand master of the turtle hop then try this:

```
Remove the ELSE 1170 from line 1190
and insert these lines
1193 ON SK GOSUB 2720, 2590, 2590
1196 GOSUB 2180
1199 GOSUB 1390
and now see if you can still get such a massive score!
```

3D ESCAPE — ZX81

ZX81 owners were puzzled by line 1560 in 3D Escape from September. Although the line was printed out, it does not make sense in Sinclair Basic.

I loaded the tape which the author sent us and it was still there on the screen. I can only assume that our RAM pack has a fault in one of its bits, but I managed to find out the correct value by changing line 1570 to PRINT A.

The program then printed the numbers from 6 to 11, so it seems that the strange dollar sign should in fact be a number 1. Clever, eh?

Logjam — Atari: Logjam for the Atari from October's issue lost half a line during printing. Line 5330 ends in a lone "D". This should say DRAWTO 71,39.

Vic Tips: I said in October that SYS 256 is the same as LOAD. This is not quite correct; SYS 256 starts a machine code program which is at that location. Therefore it will only load if there is a relevant machine code program there.

Texas — Slalom: Slalom from October's issue for Texas works fine, except that your score is not set to zero after each run. To cure this, add the following line; 105 SCORE = 0

Manhattan Invasion — Spectrum: You may find that the program does not register hits and also that the missiles are not drawn correctly. You can correct this by adding a command to line 1 by typing

```
1 INK 7: GOTO 100
and the program will now work correctly.
```

Well that's it for another month. Remember that you can always talk to me about your computing problems on 01-278 3881 between 9.30 and 5.30 Monday to Friday. Any tips published in this column will earn £5.

BY ROBERT SCHIFREEN

NO CHARGE FOR Atari • Commodore 64

NEW ATARI 600XL

A brilliant new computer from Atari. Before you choose a computer, check this specification.

- ★ 16K RAM expandable to 64K with one plug-in pack.
- ★ External processor bus for future CP/M module running CP/M2.2 with its own 64K RAM.
- ★ International character set.
- ★ 256 colours - up to 128 displayable at one time.
- ★ 5 text modes and 11 graphics modes.
- ★ Full-travel typewriter-style keyboard.
- ★ 24K built-in BASIC and operating system.
- ★ 4 special function keys.
- ★ Software compatible with almost all existing software for 400/800.

Atari 600XL Computer (AF77J)	Price £159.95
Extension RAM Pack for 600XL (AF79L)	Price £89.95
Program Recorder (AF80B)	Price £49.95
Disk Drive (AF81C)	Price £269.95
Colour Printer (plain paper) (AF83E)	Price £199.95
Letter-quality Printer (AF82D)	Price £299.95
Joysticks (AC37S)	Price £13.95
Le Stick (AC45Y)	per pair Price £24.95

The Atari 800XL is unlikely to be available before Christmas, but is in any case no different from the 600 XL except all 64K RAM is built inside box.

Check out our huge range of software for Atari.
Ask for our free leaflet XH52G.

★ Maplin are an authorised service centre for Atari ★

Join the UK Atari Computer Owners Club, an independent user group. Send £3 to Ron, P.O. Box 3, Rayleigh, Essex SS6 8LR for 4 issues of club magazine. Issue 3 now available. State which issue to start subscription.

POWERFUL CGL M5

The M5 contains one of the most powerful colour video processors available. An incredible 32 sprites simultaneously and 16K of RAM dedicated to graphics alone. Driven by the powerful Z80A main processor, there M5 contains three tone generators and a noise generator all with envelope control like a mini-synthesiser. The M5 comes complete with BASIC, superb handbooks for beginners and lead to connect to almost any standard cassette recorder.

CGL M5 computer (AF64U)	Price £149.95
BASIC G - A BASIC with extended and very powerful graphics commands (KS01B)	Price £34.95
Joypads (AF65V)	per pair Price £24.95

Lots of new peripherals and software becoming available now.
Check with our sales desk for further information.

If your order contains over £120 worth of computer hardware apply now for credit with no extra charges. Telephone: Mail Order: (0702) 552911; London Shop: 01-748 0926; Manchester Shop: 061-236 0281; Birmingham Shop: 021-356 7292; Southampton Shop: (0703) 25831; Southend Shop: (0702) 554000 or write to P.O. Box 3, Rayleigh, Essex. SS6 8LR.
You pay 10% down, then 10% per month for a further 9 months, (to nearest penny). Example: Atari 600XL. Cash price 159.95. Credit terms £15.95 down, then £16.00 per month for nine months. Total £159.95 which equals the cash price.
Credit quotations on request. This offer subject to approval which may take up to 48 hours or more, and is only open to those who live on UK mainland and are over 18. Please note that we act as credit brokers for this service.

EVERYONE has dreams of flying or falling, so they say. Thinking again about pinching game ideas from SF, I realize that many stories feature flying or falling through endless passages or tunnels.

Alice in Wonderland must be one of the first — remember her drop down the rabbit hole? I've often wondered whether Carroll was inspired by the lad who, several years before *Alice*, fell 250 feet down a Great Western Railway tunnel shaft and all the way down kept shouting "Below!" to warn those underneath — thus proving at last that it wasn't the speed of the fall that killed you, just the sudden stop at the bottom.

In A. E. van Vogt's *Slan* — his most readable book, by the way, although it was his first — and Damon Knight's space-opera *Beyond the Barrier*, people in strange craft go diving straight down into the solid Earth.

Charles Harness's *The Paradox Men* features a terrifying plunge down a mile-high wall in an early chapter and an even more bizarre one into a bottomless sunspot near the end.

Samuel Delany's *Nova* has a spaceship steering down into an exploding sun and — because this nova is for some unlikely reason doughnut-shaped — through the hole to safety. All good rousing stuff; any SF fan will think of many more examples of the Long Drop.

Of course *Star Wars* swiped traditional SF ideas from everywhere (and then they had the nerve to complain that *Battlestar Galactica* plagiarised *Star Wars*!).

Sure enough, the ultimate assault on the Death Star involves a long hair-raising flight down this narrow trench like a steel railway-cutting, although even that wasn't as mind-blowing as the *Star Gate* sequence from 2001.

Indeed these high-speed flights through narrow spaces and dizzy perspectives are powerful stuff — for absolutely dreadful psychological reasons, according to Damon Knight in a chapter of his *In Search of Wonder*, one of the more readable and unpretentious books about SF.

So if you enjoy the arcade game *Scramble* and its derivatives, you probably suffer from appalling neuroses. It's still healthier than being a science fiction writer!

I wanted to invent a mini-game which, without too much software, could perhaps conjure up this feeling of vertigo. Which reminds me that *Vertigo* is the title of a fine book by Bob Shaw, whose hero ends up having to plunge

OBLIVION

sickeningly down narrow shafts out of a hotel in the sky.

My version simply uses the left and right arrow keys to steer a tiny craft this way and that as it falls down a horribly irregular "tunnel".

You fall forever. You try not to hit the walls at left or right. Likewise you avoid the lumps of space-junk you pass on the way down; but you score points for ramming and destroying the # symbols which rise from the deeps.

Each time you crash, your replacement ship appears a bit further down the screen, giving you less time to see and plan for the obstacles ahead. When you're forced clear off the bottom of the screen, the game is over. Can you score 100 or 200 before then?

The listing suggests that the game's about zooming down an endless hyperspatial tube, avoiding debris while ramming alien nasties. It could just as well represent Alice falling down a convoluted rabbit-hole, seizing jars of orange marmalade while avoiding, er, bats or cats.

The listing is for a Tandy Model I Level II. It should transfer with some tinkering to most machines: the important thing is that the screen must have automatic scrolling, this being what gives the game that heady speed which my yawning friends have compared to a slug running amok. A few notes:

Line 111 takes advantage of the TRS-80 space-compression character codes, preparing an array of blank strings of all required lengths, saving time on `STRING$` function calls later in line 303.

L, R and X represent, respectively, the width of the walls to left and right, and that of the space between them.

The more esoteric conditionals like lines 302 and 404 are concerned with making sure the "random" changes in tunnel width never actually close the path off altogether.

Line 305 alters your horizontal motion (the variable `DZ`) in a semi-realistic way according to pressings of arrow keys. A touch of the left-arrow adds a bit of leftward speed; another touch adds a bit more; a touch of the right-arrow at this point only reduces your leftward speed, another being needed to stop and yet another to set you moving to the right. Moral: don't build up huge speeds, it takes time to slow down!

The PEEKs and POKEs are nothing exotic — merely quick ways to handle some of the screen graphics.

Type in the listing, then, and thrill to the awful sensation of falling. Will you be able to sleep peacefully at night again?

Ask your dealer
about these exciting
new Galactic Series 2000
2nd Generation games.

20 COMMODORE 64 HOME COMPUTERS TO BE WON

ALTERNATIVE PRIZES
OF DISK DRIVES OR
PRINTERS FOR
WINNERS WHO ALREADY
OWN CBM64's

PLUS 100 RUNNER UP PRIZES VIC20/CBM64 OR DRAGON JOYSTICKS

Galactic Software are giving away all these prizes to the lucky number winners, anyone who buys a Galactic Series 2000 game before Christmas could win!

For YOUR chance to win a prize simply fill in the entry form with your guess at one of the lucky numbers and send to us with the bottom right corner of the cassette cover of any Galactic game OR send your entry together with your order for any game. Our computer has chosen 120 random numbers between 1 and 10,000, one for each prize. The closest guess to each number wins the prize.

Closes Dec.24th 1983. A list of all the winners will be available.

In the future... in a galaxy far, far away a second generation of games was created. They were time warped back to our dimension for you to experience, NOW.

The Galactic Series 2000 is here at last. Games for the VIC 20, Commodore 64 and Dragon 32.

All series 2000 games are only £5.50 each. Money back guarantee.

Unexp. VIC20 games - Keyboard or Joystick.
Commodore 64 games - Joystick control.
Dragon 32 games - Keyboard control.

Bug Diver: In this fast paced addictive arcade game, as a mere beetle you've gotta be fast to outswim the merciless bug eating fish while stealing their precious eggs.

BUG DIVER-
VIC 20,
Commodore 64,
or Dragon 32

FROGGY-
VIC 20,
Commodore 64,
or Dragon 32

Froggy: Incredible animation in this high performance graphics experience. Frogs, trucks, cars, boats, logs, turtles and lilyponds all combined to give your brain a real workout.

ROBOT
MOUSE- VIC 20

Robot Mouse: In this futuristic arcade game you collect atomic cheese from the floor of the space maze avoiding the mean malfunctioning robots who will on contact.

NEUTRON
ZAPPER- VIC 20

Neutron Zapper: You pilot one of the best space ships ever built, but that's no protection in this galaxy. Your survival depends totally on the speed of your reflexes.

SPACE
SHUTTLE- VIC 20

Space Shuttle: Test your reflexes to the max as you attempt to rescue psychopathic scientists from the moon. Beware of the hazardous space fragments in this hectic challenge.

3D MAZE-
VIC 20

3D Maze: The ultimate maze game features brain power not fire power. A visually breathtaking 3 dimensional display with a tormenting time factor as the 4th dimension.

GRAPHICS

By Garry Marshall

OVER THE RAINBOW ON THE SPECTRUM

The word spectrum conjours up a vision of bright colours. And the Sinclair computer of the same name is supplied with a wide variety of colours to create interesting graphic displays. The "canvas" the Spectrum provides for high-resolution graphics is a rectangular array of 256×176 dots. Displays are created by colouring in these dots with colours from the Spectrum palette.

Horizontally, along a screen row, the dots are numbered 0 to 255 from left to right. In the vertical direction, up a column, they are numbered 0 to 175 from bottom to top.

Thus, with this numbering scheme the dot in row 0 and column 0 is at the bottom left of the screen, and the dot in row 175 and column 255 is at the top right.

As far as colour is concerned, the PAPER command is used to set the background colour, and INK the foreground colour in which the plotting takes place.

By using the PLOT command any individual dot is coloured with the current ink colour. The command takes the form PLOT x, y and it causes the dot in column x and row y to be coloured in.

A line can be drawn with DRAW and it causes a line to be drawn from a starting point to a given end point.

The starting point is either where PLOT last plotted a point or where the last line produced with DRAW ended, depending on which was done more recently.

The form of the DRAW command is DRAW x, y with x and y giving the position at which the line should end.

However, they specify the point at which the line should end relative to the starting position. In this way, the line ends x dots to the right of the start as long as x is positive, but x dots to the left if x is negative.

Similarly, the end is y dots up from the start if y is positive, but y dots down if it is negative.

Because DRAW works in this way, it is a little tricky to use until you get used to it. Its form does make it ideal for writing a subroutine that plots an object at the current starting position, though, and when this can be done it is easy to move the object around the screen.

This can be illustrated with an object that has a simple shape, and so we choose a triangle that points upwards and is 8 dots high and is 12 units along the base. This can be plotted at the current starting position by the subroutine:

```
1000 DRAW -6,-8
1010 DRAW 12,0
1020 DRAW -6,8
1030 RETURN
```

The triangle can then be plotted at the centre of the screen by:

```
10 PAPER 1: INK 6
20 PLOT 128,88
30 GOSUB 1800
```

The triangle can be moved

around by plotting it again in the paper colour to erase it, moving to a new position with PLOT and drawing it in the ink colour, like this:

```
100 INK 1: GOSUB 1000
110 PLOT 148,68
120 INK 6: GOSUB 1000
```

The DRAW command can be used to create arcs and circles as well as straight lines. By giving it a third value so that it takes the form DRAW x, y, a the starting and finishing points are still the same, but the curve connecting them passes through an angle a as it traces its path.

It should be noted with care that a is in radians and not in degrees.

Since an angle of 2π radians corresponds to a complete revolution, or a complete circle, an angle of π , for example, gives a semi-circle.

The illustration shows the results of giving a the values $\pi/2$, π and $3\pi/2$ while using the same start and end points.

Using DRAW in this way, the following subroutine plots a triangle with curved sides at the current starting position.

```
2000 DRAW -6, -8, -PI/3
2010 DRAW 12,0,PI/3
2020 DRAW -6,8, -PI/3
2030 RETURN.
```

BBC 32K 747 FLIGHT SIMULATOR & BRIEFING
ALL OPERATING SYSTEMS

A full blown, pilot written simulation (writer of the famous Atom 747) real time instrument and visual display, 3D runway view (Heathrow or Gatwick), large dials, moving pointers plus digital readout. Demonstration approach and landing. Full, separate briefing program. Area chart, notes and flight plan. Fantastic!

GREAT SOFTWARE

DISASTERS

Not so much a disaster — more a way of preventing them. At last software houses have started to think about YOU, the customer. A group of leading software houses have formed an association which has in turn established a Customers' Charter to protect the rights and interests of the people who purchase their products. We decided to take a look at the new Guild of Software Houses — GOSH for short! — and what it hopes to achieve.

The Guild has been set up by a number of leading software houses including Bug-Byte, New Generation, Quicksilver, Salamander, Silver-soft, Softek and Virgin Games.

The Guild says it was founded in response to public demand for a little more discipline from the software houses. All GOSH members have pledged their support to a Customers' Charter which includes commitment to maintain promised mail-order delivery times, replace defective stock and deal promptly with complaints.

There is also a Dealer Charter for the trade and a Code of Conduct for software houses in their dealings with one another, which outlaws the poaching of programs and programmers.

Any software house found to be in breach of either the Charter or the Code of Conduct will be subject to the Guild disciplinary procedure involving fines and ultimate expulsion.

With all these conditions attached to membership, the Guild hopes that their logo will quickly become a sign of quality and service to customers and dealers alike.

Membership of the Guild is open to UK Software Houses at an annual subscription of £500 but, in order to sustain the Guild's standards, only houses able to satisfy the committee that they can live up to the Guild's pledges to dealers and customers will be elected.

So our advice is to take advantage of the Guild's offer of help and assistance. Make sure all the software you buy matches up to the high standards they have set and you won't go wrong.

Meanwhile we're still interested to hear from any of you who feel you have a Great Software Disaster on your hands. Just drop us a line including all the details of your problem and we'll attempt to help you out. Remember we're the reader friendly magazine!

DEALERS' CHARTER

1. Members will advise dealers of their individual delivery dates and will guarantee delivery within this time.
2. Members guarantee to maintain good standards of customer relations and to deal promptly and thoroughly with complaints. Action on complaints will normally be taken within five working days of receipt.
3. Where unavoidable difficulties do occur, outside members' control, dealers will be informed of them as early as possible and will be kept informed of developments.
4. Members undertake to avoid advertising products as available before this is in fact the case.
5. Members will guarantee a high technical standard of quality and reliability of their product and will exchange genuinely faulty or defective goods. (Dealers have a responsibility to ensure that goods returned are genuinely faulty.)
6. Members of the Guild will maintain high standards of business integrity in compliance with this Code of Practice. Member's terms and conditions of trade will be available on request.
7. The Guild of Software Houses will act to ensure that high standards are maintained. In the event that a complaint can not be resolved then dealers must make it clear to customers that they have the right to refer the matter to the Guild. Complaints should be directed in the first instance to the supplier of the goods, but if this fails to provide satisfaction, write to the Guild of Software Houses, 71 Park Lane, Tottenham, London N17 0HG (enclosing any relevant correspondence) and the matter will be taken up on your behalf.

GUILD OF SOFTWARE HOUSES CUSTOMERS' GUARANTEE

1. Members of the Guild guarantee a high technical standard of quality and reliability for their products. Faulty or defective merchandise will be replaced free of charge and despatched promptly.
2. Orders placed with members will be filled with a minimum of delay. Details of members' individual delivery times will be displayed prominently in advertising and strictly adhered to. In no case will deliveries exceed 28 days.
3. Members guarantee to maintain good standards of customer relations and to deal promptly and thoroughly with complaints. Action on complaints will normally be taken within five working days of receipt.
4. Members undertake to avoid advertising products as available before this is in fact the case.
5. Where unforeseen difficulties do occur, which are genuinely outside their control, members of the Guild undertake to keep customers well informed of developments.
6. Members of the Guild guarantee high standards of business integrity in compliance with this Code of Practice. Members' terms and conditions of trade are available on request.
7. These guarantees will be backed up by the Guild of Software Houses and action taken against any member company which fails to meet the required standard. Complaints should be directed in the first instance to the supplier of the goods but if this fails to provide satisfaction, write to the Guild of Software Houses, 71 Park Lane, Tottenham, London N17 0HG (enclosing any relevant correspondence) and the matter will be taken up on your behalf.

THE SEVENTH

TRADING COMPETITION

There were many entries for the trading competition again this month, although not quite as many as last turn.

Remember that this part of the competition is open to all readers whether or not you are a registered player of the Seventh Empire play-by-mail contest.

You have to predict which star will have the highest trade index for the next turn. The trade index is the right hand figure at the bottom of the square.

Highest trade index at the end of this turn was at JADEG, with a total of 1050; slightly up on the record set last month of 1000 at Apel.

Unfortunately no one managed to get the right answer this time so we'll keep the prize for ourselves.

Keep entries coming in for this turn — there's some software for your computer up for grabs for the winner. Entries on stuck-down envelopes or postcards please.

If you'd like to enter for the remaining turns of the Seventh Empire proper then just send in the coupon below and we'll get a rule book and some starting positions off to you in time to play the next game.

You may have noticed that the C&VG postcode has changed, so here's our modified address. Seventh Empire, Computer & Video Games, Durrant House, 8 Herbal Hill, London EC1R 5EJ.

The Trade Index is calculated by the computer monitoring the number of merchant fleets arriving at and leaving a star system.

Traders coming to the star system are the sellers, traders leaving the system are the buyers.

Each star also has a Trade Value which comes into the equation. Hearts are Elixir Stars (worth 200 points), Diamonds are Gem Stars (worth 150 points), Asterisks are Energy Stars (worth 100 points); and circles are Gateway Stars (50).

The crucial equation bringing all these elements together is: Trade Index = Trade Value × Buyers/Sellers. So a system which has seen a mass exodus of traders tends to have the best Trade Index.

So if 50 Buyers leave a Gem Star and 30 Sellers arrive the Trade Index = 250 (250 = 150 × 50/30).

BATTLE REPORT

There were 23 battles fought throughout the galaxy this month. None was successful but the closest result came from Govax where 220 defenders saw off the 6 attackers with little trouble.

Again there were no positive battle bonuses this time. All are zero except Xapus (-2) and Girix (-3).

Quite a few changes took place on the diplomatic diagram this turn. A black line joining two stars indicates a state of war between them. If there is no line then they are at peace.

The raid penalty for next turn is again 1.

Positions of the imperial ships are as follows:

D'Taans-soner, Sun-tuxux, Bloodline-xugod, Dead-yuses,

Amethyst-kolol and Water-jinis.

No entry was received this month from the controller of the pirate ship.

PROFIT AND LOSS

Once again there's some high scoring going on. Top of the league this month is player 1780 with a score for this turn of 4250.

Almost 3800 sets of moves were processed this month. There are only a few places left in this massive game so if you'd like to enter then you'll find the coupon at the bottom of this page.

As mentioned already, top scorer is player 1780, namely M. Walsingham from Surbiton. The remainder of the hall of fame looks like this: 2nd, M. Dunderdale of Longton, Preston (4000), 3rd, A. Sparkes from Havant, Hants (3750). 4th, K. Whitefield of Strood, Rochester (3730). 5th is A. Jackson from Burnley, Lancs (3500). 6th comes A. Taylor of

ANOTHER CHANCE TO ENTER

If the Seventh Empire appeals to you we still have a batch of rulebooks ready to send out. No guarantees I'm afraid but we'll put you ready should any of the 25,000 fleets currently on the map, drop out. Send in the form below.

Please include me in the Seventh Empire Competition.

I name my tribe:

My name is:

Address

Telephone

Before you send us your moves make sure you can answer YES to the following.

If moving — is it a friendly empire one square away?

If trading — is it a different star type?

If raiding — are you NOT moving diagonally? Is it the first phase of the move?

If returning — is it phase 2? Are you returning to the same empire?

If attacking — does it belong to an enemy empire? Is it a horizontal or vertical move?

If moving to a gateway star — is the other movement phase crossed out?

SEVENTH EMPIRE

Carleton, Lancs (3445). 7th is G. Marshall of Redditch, Worcs. (3250). 8th, T. White of Haxby, York (3163). 9th M. Allen of Fulham, London (3100) and 10th is D. Speight of Carleton, Blackpool with 3000.

You may be interested or astonished to know that the top overall scorer for the game so far has an incredible profit of 9449.

Remember that if you've lost track of your fleet's progress then you can phone for help, but only on Friday afternoons. The computer is used for other things during the rest of the week so Seventh Empire queries cannot be answered.

Orders for turn 5 must reach us by the 23rd of October. We've had quite a few complaints about the lack of time which we allow for the turnaround of orders. Unfortunately there's nothing that we can do about this. If we allowed just one more day then there wouldn't be time to process the turn and to get this page written.

FINDING YOUR SCORE

You can find your profit for this month from the black and white table on this page. Cargo profits are black on white and plunder profits are printed white on black.

The star you move from is printed down the left hand column, and the one you move to is along the top.

Controllers of the imperial ships for turn 4 are these. D'Taans — player 3201, Sun — 1781, Pirate — 2064, Bloodline — 1780, Dead — 2300, Amethyst — 1877 and Water — 2182.

PULING

MORE AMAZING THAN RUBIK'S REVENGE

There is absolutely no need to panic or become all bitter and twisted at the sight of yet another cube — this one does not move, honest!

If you can bear the pun, it is even more *amazing* than Rubik's Revenge because hidden in the maze of symbols is a path to take you from one edge to the opposite.

Just line yourself up at the **START** and hop onto one of the brown squares

(you'll have to work out which is the right one) and work your way from square to square until you reach the correct blue square from which you can legally hop over the **END** line.

Each of the four symbols has a meaning: **UP**, **DOWN**, **RIGHT**, **LEFT** to the adjacent square. The direction each represents is shown by the arrows near each face.

Hold on a moment though — the

meaning for each symbol only applies to one face; i.e. the symbol for, say, **DOWN**, on face 1 cannot also mean **DOWN** on face 2 or 3.

One other useful fact which may help to reduce the apparent awesomeness of the task to near triviality is that **no symbol has a meaning which would take you right off the cube's faces**, except, naturally, one of those in the blue squares.

With these facts and our useful grid in which you can enter X's and √'s for impossible and definite meanings it really isn't too much of a task for you to trace the one route through this cubic maze. But can you do it?

FACE 1		↗	○	⊗	⊞

OSTENTATIOUS PYROTECHNICS!

The Ostentatious Pyrotechnic Company is justly proud of it greatest invention — as each firework bursts forth into the lower reaches of Space stars appear containing coin denominations. By adding them up before they fade you can see just how much has gone up in smoke.

All of which made it triply annoying for Sir Herbert Lemmon when he saw his chauffeur, deputising as festival arsonist, let off three costly specimens at the same time.

The stars became so intermingled that it was impossible for the guests to be impressed with just how much each had cost.

After the event all he had left were a photo of the tragedy plus the dim recollection that the three prices of the different fireworks were equally spaced

Since there are 92 different ways to put eight queens on this chessboard in such a way that they do not attack each other (i.e. no two queens lie on the same straight line, horizontal, vertical or diagonal) we won't ask you to do that . . .

On second thoughts, you may like to give it a try, as, to get it right first time, is not as easy as it looks.

No, your real task is to find the one way out of all that lot which, when you add up the eight numbers you cover, scores the highest total. So the eight ladies should be placed . . . where?

apart and each amount was made up from just six of the stars.

A call to the company office in Bermuda further elicited the facts that the Catherine Wheel had as many FIVES as the Vesuvius had TWENTIES and the Roman Candle had as many TENS as the Vesuvius had FIVES. Can you work out what each cost him?

Also we'll award a unique electronic game called Pass-Me, produced by Electroplay of Esher, Surrey to the first five correct entries opened after the closing date, November 16th.

The usual competition rules apply so light the mental touch paper and remind those near to you to stand well back as your genius explodes.

SOLUTIONS

We may just bring Barbara back!

If we can all do this at the same time, say 10pm next Thursday fornight, white witch on a darker background!

PUZZLING

BEWITCHING BARBARA

As the witching hour approached on Halloween Barbara may have made the last mistake of what had already been a pretty accident-prone life.

Never a traditionalist, she had decided to go abroad dressed as a witch should be — entirely in black with blackened face and hair as well.

Later gossip has it that the genuine sirens of the district took exception to this and crashed a broomstick into the main power line just as she sallied forth after having this picture taken.

The bare fact is that a power cut plunged the village of Much Mulching into a darkness as black as her costume and she hasn't been seen since!

If only she had settled for a white sheet off Widow Spriggs' washing line like the rest of the youngsters.

Thanks for volunteering, but you cannot help to trace her now . . . though you do have it in your power to produce a *white witch* from the picture and, you never know, that may persuade the sprites to release her.

No, you don't have simply to splash a pint of gloss over the page — in fact you *must not use any materials at all!* You are not even to touch the picture in any way.

To break the spell and make white from black all you need to do is . . . WHAT?

CAN YOU RE-JIG THE JIGSAW?

As you have no doubt divined already, we are asking you to complete this fully interlocking four-piece jigsaw puzzle so that four five-letter words can be read across and down, starting from the arrows, and two three-letter word lie on either side of AVA.

The pieces cannot be turned over but can be rotated — and by sheer magic the letters will remain the right way up! So there are no dirty tricks like an N becoming a Z.

There we are then — which piece goes where and which way round? Can you re-jig the mind-boggling jig-saw?

BY TREVOR TRURAN

WHAT A BIND!

Can't find your back numbers ... magazines all over the place? It's so easy and tidy with the **Computer & Video Games** binder to file your copies away. Each binder is designed to hold a year's issues and is attractively bound and blocked with the **Computer & Video Games** logo.

Price U.K. **£4.50** including postage, packing and VAT. Overseas orders add 35p per binder. Nat. Giro No. 5157552. Payment by **ACCESS/BARCLAYCARD/VISA**. Send coupon below detailing credit card no. and signature.

Please allow 3/4 weeks for fulfilment of order.

Why not place your order now? Send the completed coupon below with remittance payable to:-

**PSS...THE FUTURE MAKERS
INTRODUCE**

M CODER II

**The ultimate integer basic compiler for
the 48k Spectrum and 16k ZX81
Instantly turns your basic into machine
code at the touch
of a key!**

Personal Software Services

After the huge success of M Coder (THE original compiler for the ZX81 and Spectrum) we have gone one stage further and improved it to make programming even easier!!

M CODER II now handles STRINGS (NOT string arrays) as well as 95% of all integer basic, and we have made it even easier to use.

The list of commands are too long to print here — but we are so sure that you won't be disappointed, we are prepared to offer a NO-QUIBBLE GUARANTEE.

If you are not completely satisfied, return M CODER II within 7 days from date of purchase and your money will be refunded in full — without question.

SEND PSS A CHEQUE OR P.O. TO THE VALUE OF £9.95 FOR THE SPECTRUM VERSION OR £8.95 FOR THE ZX81 16K VERSION AND WE WILL SEND THIS REMARKABLE NEW PRODUCT TO YOU BY RETURN POST.

JOIN OUR ADVENTURE SWAP SHOP

Are you an Adventure hoarder, or are you the type whose tape is well worn out by the time the game is solved? What do you do with an Adventure when all the mystery has gone from it?

Graham Kennedy and Stuart Field wrote to me with just this problem, and wondered if anyone would care to do a one-to-one swap. Quite by coincidence, I noticed, they had compatible computer systems — so I put them in touch with each other.

Is there any Apple II owner whose old copy of *Mission Impossible*, *Savage Island* or *Golden Voyage* is gathering dust, and would like to swap it with Graham Boddy for any of Scott's other Adventures?

LIGHT TOUCH FOR DRAGONS

Finding a good Adventure game for the Dragon is causing some people as much difficulty as others have solving Adventures!

Although not exactly an orthodox Adventure, here's a game that combines features of *Dungeons and Dragons* with an Adventure style, using a series of maps and mazes for movement.

I refer to *The Ring of Darkness* from Winterson. The player starts by choosing his character. I chose to be an intelligent elf, and after loading other programs from the tape, the game started.

I moved around to various locations, some of which were townships with facilities to purchase food, drink, weapons, magic and other things.

Food being an essential, I was a regular customer, since each move around the main map used up one unit of food. I also tried a drink, and was treated to a very potent beer!

Travelling around had its hazards, attacks by bandits and others being quite commonplace, so after dying a few deaths I included additional weaponry in my purchases.

Although progress in the game is

described by text, movement is controlled by the arrow keys, and most other commands are single letter codes. There are about a dozen of these, but they are no problem to pick up — just as well, since parts of the action are in real-time, and quick responses are needed.

Not an Adventure that poses problems, depending more on strategy than problem solving, but an interesting game, nonetheless.

ENTER HERE AT YOUR PERIL!

I am always suspicious of ground covered with leaves, for leaves are notorious for obscuring gratings. A grating is never straightforward to open and enter, but enter the adventurer must.

The chances are that it is not there simply to drain stormwater, but may be relied on to lead to the meaty part of a game.

I got quite excited when I discovered my first grating, and congratulated myself on my perception. A few gratings later, however, and leaf-shifting had become a fairly routine task.

So it came about, in *Knight's Quest*, that as an experienced grating-finder I had those leaves swept into a pile in no time, and sure enough, there it was! Now to open it — was it a brute force grating, or an unfindable key type? Whatever the answer, I was bound to need an implement.

So I searched the land to Camelot Castle and beyond, meeting up with elves and a dwarf, an impassable giant, and a glaring Dragon. (No Adventure is complete without one, is it?)

En-route I decided to pick a fight, and was dismayed to be told I was without a weapon, knowing I had on me a sword. Without any clues or HELP to guide me, I could only deduce that the reason was because the sword was in its scabbard.

Unsheathing it became a long drawn out word game in its own right. I make no apology for telling you that you have to "DRAW SWORD".

Ever hopeful of finding my implement I entered a cave, only to find that I could not leave it. I later discovered what I needed to get out, but never why.

And so eventually I got into my grat-

ing, finding myself in a "west-south" tunnel. My mind twisted itself into tortuous knots trying to grasp this concept.

I have mixed feeling about *Knight's Quest*. The responses are painfully slow, worse at locations which are accompanied by simple straight line graphics. These pictures are quite nicely done, but a hindrance to speed. HELP is a non-word — a pity as a few HELPs could easily explain some of the mysterious and frustrating difficulties. 'I CAN'T' type responses give no clear indication of whether one or both of the words used is recognised, or whether the action itself is illegal.

On the other hand, the plot is interesting, with many problems. The display is well laid out, and very clear. The game is big (I managed to defeat the BREAK disable, look at the listing, and return to the game), and will take a long time to solve — IF you have the patience!

Knight's Quest comes from Phipps Associates for the 48k Spectrum.

THE STRANGELAND AND THE GHOST TOWN

Back in May, Stephen Donoghue's cat had left home, and his wife was about to follow. Neither could stand the strain of trying to shoe the horse in *Ghost Town*.

So worrying was the situation, I felt unable to set off for my week's cruise on the Oxford Canal without first writing to put Stephen out of his misery.

Two months later, the horse was shod but three treasures were still missing. Stephen assembled a high powered team in an all-out attempt to find them. Perhaps I should have known better than to book a late break on the Trent and Mersey, for it heralded another letter from Sunderland. *Adventureland* had taken five hours, *Strange Odyssey* six days, but four months and still no end in sight on *Ghost Town* for our PhD, 3 MScs and 8 BScs!

The team, I diagnosed, had overlooked one simple move, so I rushed Stephen a reply. My fingernails chewed to the armpits. I begged him to let me know the outcome.

He rang late the next evening —

BY KEITH CAMPBELL

DESPERATE PLEAS OF ADVENTURERS

We want to know, but we don't want to be told! It's funny, isn't it, how a fascinating problem loses its interest if we are told the answer outright? We want the solution AND the credit for arriving at it!

We're all at it, yet without a word spoken, respect each others feelings in offering a solution! This is borne out by many of the tips I receive — shrouded in mystery or sealed up!

Like one from *Zork*-suffering William Ferran from New Malden, who was moved to write to put back in some of the enjoyment he has got out of *C&VG*. To help P.Coppins on his *Golden Voyage*, William enclosed a cryptic clue, with a neatly glued-down solu-

tion. The clue and solution are shown in Helpline.

Take Stephen Banner of Birmingham — dying to turn a block of lead into gold, in *Escape from Traam*. "Are there any hints you can give me in riddles?" he asks. But these games ARE riddles.

"Make it hard for me," he adds, "I'll enjoy the game better!" We all know the feeling, don't we?

So can anyone give Stephen a really DIFFICULT clue?

New problems arrive daily. How about *Swords and Serpents* as an example? "I have two problems", writes Robert Hughes from Stafford. "First I would like to know what the aim of the game is . . ."

"Strange fellow!" I thought, until I received exactly the same query from R. D. Nosworthy of Chelmsford. So back to Robert, who complained that the brochure illustration was nothing like the game, depicting something that was impossible to achieve.

I will be taking a closer look at this soon, and hope to tell you what sort of game *Imagic* is playing.

Does anyone know:

If Mr. Poles of Lutterworth will be able to relight his lamp in *Philosopher's Quest*, so he can find the solicitor?

How Brian Jones of Caersws might pass through the Golden Doors of *Sorcerer's Island*?

RIPPED APART, RIPPED OFF?

A game that generates many pleas for help can usually be relied on not only to be difficult, but to hold the player's interest over a long period of time. So I sat down to play *Bedlam* with great expectations.

Bedlam can perhaps be likened to a text *Asylum*. Padded cells lead off from a network of corridors, each with a door, always closed and often locked. The text is witty and plentiful, and produce a loony-bin atmosphere at least as good as *Asylum's* mixed graphics and text.

A *Bedlam* lobotomy is not as devas-

tating as an *Asylum* one, nevertheless I became distinctly derr-brained after mine! Although this surgery doesn't prevent the game from being completed, it makes playing really crazy! Luckily normal insanity can be restored by the use of a rather obscure magic word!

Strange inmates join the Adventurer in his quest for freedom — Picasso, Napoleon and Houdini to mention but a few! I liked this, and at the point of being savaged by a guard dog, left the game for a while to ponder.

Remembering the names Simon Clarke and Richard James, I dipped into my correspondence file, and found a hot tip for dealing with the offending dog. It didn't work! Curses — what sort of twisted readers have we got?

At the back of my mind was a nagging feeling that here might be one of the random elements described in Tandy's catalogue as "the way out changes every time you play".

I have since passed the vicious dog, (I can't be sure whether success is random, or exact sequence of words is required), but was disappointed to find that my difficult and intriguing Adventure was suddenly over!

Solved adventures of any standard take at least half an hour to replay — and the slightest mistake can easily extend that to an hour.

Not so with *Bedlam*. It can be completed, start to finish, in about two minutes flat. Not only that, the problems requiring a definite solution can be easily identified, and number exactly three!

Unable to believe the game was so small, I gave Simon a ring. "Yes", he said, "tiny, isn't it?" Tandy had assured him that if the dog failed to react to the poison, there were a number of alternative escape routes. But Simon hadn't found any others — have you?

Bedlam is available from Tandy on cassette for TRS-80 Models I and III at £11.95, and for the Tandy Colour Computer at £9.95. Why the price difference? A game's a game, isn't it? In any case, there's so little of it, at either price it's a bit of a rip off.

SCOTT WILL RETURN!

More of you write in about Scott's games than about all other Adventure games put together. Scott's empire is the IBM of Adventureland. And those letters are not just restricted to people who play the games!

Many readers write to ask when the series will be available for their own systems — BBC, Spectrum, and Dragon. "Please, if and when? We need 'em badly!"

I took some time out from answering the mountain of mail you send me to find out.

So here's the latest. I spoke to Mike Woodruff of Calisto Computers, Adventure International's UK agents. He told me that only one thing was holding up the release of the Scott Adams series for BBC, Spectrum, and Dragon — a suitable programmer!

He will have to be a top-notch machine-code programmer. As soon as one can be found, says Mike, the games will be converted.

To clear up the confusion created when in error I stated that *Mystery Fun House* was available for the Vic-20, I can now reveal all!

Commodore, who have the sole rights for Vic versions of the games, confirm that only the first five of Scott's games are currently available. The good news is that they are negotiating a deal with Adventure International that will hopefully lead to the release of the rest of the series.

So file all my tips away for future reference, you Vic, BBC, Spectrum and Dragon owners — you may be glad of them soon!

GEALE OF STEVE HOSTOWN HORSE

desperate for a decent night's sleep. Still one treasure missing! I told him it was time he dug something up.

"Well!!", wrote Stephen a few days later. "Without your tip I'd still be looking for that **** ***** in the year 2000! *Ghost Town* has finally bit the dust so I can go back to more mundane chores like eating and sleeping. What I really need is a rest, so I'm going to do something easier like *Pirate*. After that I shall tackle the Scott Adams Adventures in chronological order. Three down and ten to go, but one day Adams . . ."

The tips I gave Stephen are shown below, plus help for Robert Miller stuck inside a Sphinx he entered via a Time Machine.

TAKE THE TABLETS

Two tablets, two fountains. Note the quotation marks on the second tablet. Solution: say "Sun", when you can see the mountain, not actually on it! Jumped any canyons or dug any good roots lately? Looks as if the lever at the end of the corridor keeps slipping back.

ASTRO CHASE

SPLAT!

ASTRO CHASE

CITY PATROL

MULTITRON

As you can see Astro Chase is our Game of the Month this issue. The opening display is something not to be missed — so don't miss our review on page 154. We also take a look at a brand new two-in-one game called Death Mines of Sirius, which has a soundtrack which must be heard to be believed. Read all about it on page 156. There's an official Frogger game for the Dragon on page 156, and a version of a starship shoot out called Star

Jammer, also for the Dragon, on page 162. Splat is the unpromising name for our Spectrum game under review this issue. Find out if it lived up to its name on page 162. That big ape makes a comeback on the Vic-20 on page 162, while the word-smiths among you will enjoy Word Feud on the CBM-64. Plus many more. How do we get them all in! Watch out for our new improved Reviews section next month!

THORN EMI PRESENTS

COMPUTER WAR

BASED ON THE HIT MOVIE

WAR GAMES

MISSILE WARNING

R Slot "Computer War" into your computer (Texas Instruments† 99/4A; Atari 400*/800*; Commodore‡ Vic 20†) and you'll be playing the most challenging and sophisticated game around.

America's air defence system (NORAD) has detected what it thinks are Russian missiles.

But the missiles are actually a nuclear war simulation program accidentally activated by a computer whizz kid.

The problem is, the computer can't tell the difference between simulation and the real thing.

Unless you move like greased lightning, the system will launch a counter wave of missiles that will devastate at least two continents.

If trying to knock out the bogus missiles in the computer's memory banks doesn't make your palms sweat, the second half of the game will.

Crack the 'shut-down' codes of the U.S.A. missile bases, and you will have saved the world.

Just one word of warning: Don't lose.

If your nerves aren't frayed after that, try our other action packed titles.

There's the popular "Submarine Commander" and "River Rescue" now on TI† 99/4A, †Vic-20† and Atari 400*/800*.

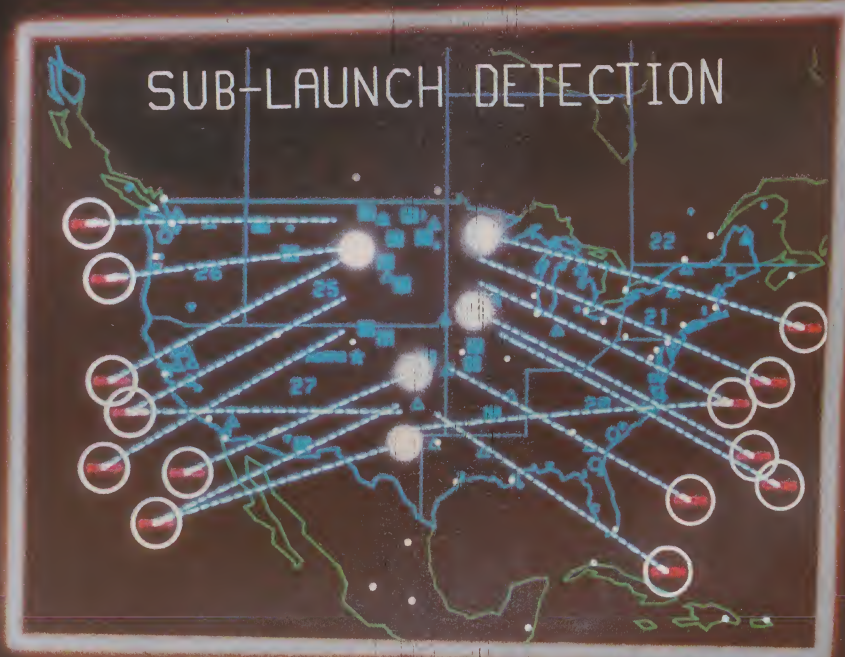

The exciting "Carnival Massacre" and "Killer Climb" you'll find on Atari 400*/800*. And the highly skilled "Mine Madness" and "Tank Commander" are on †Vic 20.†

THORN EMI Computer games. They'll blow your mind.

The world's greatest computer games.

R·E·V·I·E·W·S

PANIC IN THE CITY AS ALIENS ATTACK

CITY PATROL

Suddenly a million voices cried out for help at once. Then silence as the holocaust swept across the helpless city! Can you save the day?

You are the supreme commander of a laser ship. Your task is to intercept and destroy all alien suicide craft.

Your rank will be raised depending on how many aliens you destroy in relation to the amount of destruction being caused in the besieged city.

The city consists of four layers of buildings which all move independently to each other at differing speeds in relation to the viewing angle, creating a 3D effect.

The eight way direction is controlled by keyboard which I found took a long time to master. The all character graphics scroll in four directions producing a realistic flicker free flying simulation.

Alien space ships appear near the top of the screen and keep a constant direction thereafter. When an alien stops, it automatically goes into its search and destroy mode! You will be destroyed if it hits you five times.

Two quite frightening features are the hidden aliens located elsewhere in the city — off screen. These may fire their laser demolishing a building. All you will see is a brief flash in the sky.

Also if — by unfortunate means — an alien completes its mission and reaches Ground Zero the game freezes for a second followed by a series of large explosions that blow a large chunk of your city to smithereens!

You also have the useful option of flying at maximum speed by holding two keys down simultaneously, this results in the buildings wizzing past you at tremendous speed!

By touching any key except the directions keys or 'A' for surrender, you will activate the ship's lasers.

Trapping an alien in your sights is not at all easy. First you must wait until it isn't behind a first row building, then

when you are level with it, advance over it keeping equal speeds and quickly fire! A steady hand and accurate eye is needed, not as easy as it sounds.

The city is made up of several types of buildings all differing in shape, size and design. If you accidentally fire on a building it will be destroyed.

Every layer one building you hit loses you ten points, and up to 40 points for a layer four building. This stops you demolishing the city to find aliens.

There are three levels — average, difficult and impossible. I did try the impossible level and found that about twice as many buildings have been added, all much taller which cuts down your view of advancing aliens! Yes... it was impossible.

Despite some very nice graphics and realistic simulation, I thought that the game could have incorporated more interesting characteristics though it did possess a surprisingly addictive quality.

It's a good addition to games software for the ZX81 — a micro that's rapidly being left behind in the rush to bigger and brighter machines.

For those with a bit of warrior in you, City Patrol — by Macronics — is available at W. H. Smith for the Sinclair ZX81 at £4.95.

ATTACK OF KAMIKAZE TURTLES!

MULTITRON

Dodge waves of kamikaze turtles and blast packs of sluggish snails in this latest clone of the well worn Space Invaders theme.

As in all invader-style games your laser base is under attack from waves of mutants, in the case of Multitron they take the shape of dive bombing torpedoes, several winged phoenix and small snail-like creatures amongst others.

One very interesting feature in the game is that once you have managed to survive all six waves of mutants you

MIKE JERVIS, 19 PORTREE DRIVE, RISE PARK, NOTTINGHAM NG5 5DT.

have to manoeuvre your laser base through a vertically scrolling tunnel to reach the next stage of the game. If you run out of control and hit the side of the winding tunnel, you will encounter an anti-matter field and immediately be blasted into a million little pieces.

Continual use of your laser will soon use up the energy available on each level and I found it best to conserve energy by firing in short bursts. Your energy cells will regenerate themselves if you don't fire for a couple of seconds, but it is very irritating having to hang around and dodge the enemy missiles with no way of retaliating.

A very ordinary game to play in its initial stages but it is redeemed by the space corridor and the fast action waiting for you on the other side.

Multitron runs on the unexpanded Vic-20 and incorporates hi-res graphics. Good use has been made of the limited memory. The game is controlled by either keyboard or joystick and is available from Manchester-based Sumlock at £7.95.

ROAD RACER IN SEARCH OF GOLD CUPS

TRANZ AM

The year is 3472 and the once-great Earth has been destroyed. All that exists is a barren land of sand, rocks and boulders. Life nowadays is ruled by cars. Gold is replaced by petrol and your sole aim in life is the possession of the eight Golden Cups of Ultimate.

A more imaginative scene-setter to a road race game is hard to find. And the program's not bad either. Tranz Am gets away from the standard screen layout of the car at the bottom of the screen and the road scrolling towards you.

The car stays in the middle, and the whole screen scrolls in any direction. To control the vehicle you use two keys to rotate yourself just like good old Asteroids.

The screen acts as a window on the whole land, which is about seven times the size of the displayed area in each direction. The area you are searching is therefore about 50 times the screen size. The idea is to tour the land seeking and collecting the eight trophies which are positioned randomly for each game.

There are also enemy cars which roam the area and must be avoided. You have three lives.

The screen which displays the road is square, which leaves a column of spare TV space on the left. This is your indicator panel and shows the time, score, miles travelled, speed and a

reduced view of the whole land on a radar.

Control is quite easy and uses only four keys. Two to rotate and two more as accelerator and brake.

The game is also compatible with Kempston joysticks. You can pause the game if you wish.

Although the speed indicator is labelled from 0 to 400 mph, the car does not go too fast even in full speed. There are no gear controls.

Tranz Am is by Ultimate and runs on any Spectrum. It is available from W. H. Smith and costs £5.50.

SPACE SHOOT OUT AMONG THE PLANETS

ASTRO CHASE

Fernando Herera is a name that commands the same respect in American video gaming circles that a well known writer or artist would in the art world.

He is something of a maverick — Herera prefers to work for himself selling his games to the highest bidder.

His best known game is now available in the UK on the Parker Brothers label for the Atari 400 and 800.

Astro Chase takes the oldest cliché in video games but re-works it splendidly to produce a game of colourful 3D style graphics and challenging game play.

The Earth is under attack from the aliens and you are the lone pilot on a mission to clear the space around the planet.

An assortment of adversaries have to be dealt with. Chasers are spider-like craft that can destroy your ship but don't really present much threat to the Earth. Far more deadly are the Megamines which gradually surround the Earth hiding from you behind surrounding planets.

If a Megamine lands on the Earth the planet is blown to bits lighting up the whole universe.

Speed manoeuvrability, and a quick

E·I·E·W·S

finger on the trigger are required if you are to successfully defend earth.

When you have destroyed 16 Megamines you are judged to have saved the planet from one attack... But it doesn't take the aliens long to regroup and pretty soon they are back with new more sophisticated ships.

The graphics are the making of Astro Chase. The display at the beginning of the game is impressive. Your little man walks up to his ship, salutes and is then beamed up into his ship before it slowly lifts off.

The galaxy is beautifully drawn with the continents and oceans showing up clearly on the earth.

Astro Chase sets new standards for space shoot 'em ups. One of the best games I've seen for the Atari home computers. In the shops now at £29.99.

DINKY APE JOINS THE KONG CROWD

DINKY KONG

First came Donkey Kong then Donkey Kong Junior and now... Dinky Kong!

In this version you take the role of a soldier who marches rather than runs! Other than that the game is the same as the original. The object is to climb the various platforms and rescue the captured girl at the top, avoiding fast rolling barrels being thrown down by Kong.

One interesting feature are the hearts planted at random on the platforms. These may be picked up for extra points but leave holes in the runways. Barrels that roll over these holes will fall through to the platform below, although you may jump over them.

I'm sorry to say that this version fell below standard although the graphics were quite good. Two especially annoying points I found were that the program had to be loaded in two sections — the tape recorder had to be stopped and restarted (retyping 'cloud' ' ').

And if you replied no to the reply

option at the end, the program will "new" itself thus clearing the memory.

The game gets rather monotonous as only one variation screen is used which is repeated, although fireballs and larger quantities of barrels are introduced in higher levels.

Dinky Kong is available from Gloucestershire-based Severn Software for the Oric-1 at £6.95

DULUXE, THE PLANET WITH PROBLEMS

SOFT HITS

Life on the planet Duluxe is far from tranquil for BBC and Spectrum owners.

The second issue of Soft Hits, is due out in November and consists of a cassette with a game for the 16k Spectrum on one side and the same game for the BBC B on the reverse.

The game is called Airbrush and your job is to paint the floors of the prison in which you work while avoiding the waste bin and the armed guards.

At least that's what the Spectrum version is about.

The BBC game involves life on the planet Duluxe and you have to collect enough local currency to afford the fare home, while avoiding the radio-active dustbins.

This sounds like two different games but is in fact only one.

It seems as though two different people were hired to write the blurb and no one could decide which was best.

The game itself is quite playable, at least on the Spectrum version.

Control of the paint roller is via the Caps Shift, Z, P and L keys although if you don't press any key then you move downwards.

The idea is to roam the screen collecting paint pots to replenish your supply which is used up as you wander the screen.

The program uses only normal character resolution graphics with user defined characters. Your roller moves by a whole character each step which is not ideal.

The BBC version uses mode 1 graphics which should improve the situation.

Sound effects are included and are quite effective, even if it does sound like water gurgling down a plug hole.

You'll find Soft Hits in your newsagent for a very reasonable £2.45.

GREAT THEME TUNE FOR TWO-IN-ONE

DEATH MINES

Fans of action and adventure games now get the best of both worlds with the launch of a double-tape game.

The pack consists of two cassettes. One with an action arcade-type game and another with an adventure. This idea is not new, but Phoenix software has added a new twist. You cannot load the adventure without the code, which you can only get by mastering the arcade game first.

The first release in this series is for the Dragon and goes under the name Death Mines of Sirius.

A feature of the cassette system on the Dragon is the ability to record speech or music and play it through the television. This can be activated by the remote control from the recorder. Phoenix is the first company which I have seen make use of this and it works amazingly.

Once the game is loaded you are greeted with the theme music from 2001. Then, if you want the instructions, the music is played again as backing.

This, unfortunately, is the best part of the game. The action game proper is little more than a lunar lander. It is in black and white, and it flickers badly.

You and Captain Phoenix, say the instructions, must land your drone ship on the four pads at the bottom of the screen. Once you have done this you have to transport the aliens which inhabit the planet back to the top of the screen a better place.

You have to complete all 12 skill levels of the action game before you can proceed to the adventure. At the end of each level you are given a clue which will help you later on.

When you have mastered the first cassette, you will be given a code to load part one of the adventure. This consists of a four letter code, and there are nearly half a million combinations.

On loading the first part of the adventure — there are two — you are asked for the loading code. You are then told to press enter but this does not matter.

The game itself is slow. Very slow.

It's quite easy to get killed, and I found it annoying that I was asked to enter the loading code each time I wanted to play again.

The Adventure is fairly standard and uninteresting, I'm afraid. The loading sequence, though, is great.

The package comes in a posh plastic case containing two cassettes, with a total price of £9.99. from Phoenix, based in Pinner, Middlesex.

FROG SCORES A HIT ON THE DRAGON

FROGGER

Jump for your life if you don't want to be splattered all over the road! Guide your frog to his frog-hole by hopping him across a busy road and crocodile infested river in this, the official version of Frogger.

In a close representation of the original arcade game by Sega your frog has to avoid the fast moving road traffic and cross the river by using floating logs and turtles' backs as stepping stones. Beware the turtles — they are inclined to dive unexpectedly.

A lady frog appears at random in one of the five frog-holes on the far side of the riverbank.

When all five holes have been filled with frogs you move on to a new level. Things start to get more difficult as less time is allowed to get the frogs safely home, the cars move in faster convoys and there are fewer logs.

For one or two players, control is by joystick or keyboard. Keyboard control is very easy to master using the cursor keys for left, right, up and down moves. Frogger is written in machine code and the graphics and speed are among the best I've seen on the Dragon. It is available from Microdeal and all leading retailers at £8.00.

URGENTLY REQUIRE GAMES PROGRAMS

Ocean Publishing Limited, publishers for a major software house, urgently require good game programs for home micro.

ZX SPECTRUM, COMMODORE 64, ORIC, DRAGON, VIC-20, ATARI 400/800 and ACORN ELECTRON

Our national dealer network ensures maximum sales. Should your program be accepted we will pay top royalties or buy your copyright.

Write in confidence to the
SOFTWARE DEVELOPMENT MANAGER,
Ocean Publishing Limited,

Ralli Buildings, Stanley Street, Manchester M3 5FD.
OR TELEPHONE 061-832 7049

ARE YOU PLANNING A MACHINE CODE GAME?

You might want some advice on how best to present it . . . you may need extra equipment to finish it . . . you will definitely need help to produce, market and distribute it.

With a top advertising agency, and a big press relations company already signed up, we're here to help. We know our way around the market and you'll be joining a professional team of top freelance programmers producing games for the BBC, Spectrum, Commodore 64, Vic-20, Atari and Electron.

We pay royalties at 25% of net profit which could earn you £2,000 for a modest seller and if you've produced a top game then that could quadruple.

Write to us at **Box LF, Computer and Video Games, Durrant House, Herbal Hill, London EC1R 5EJ.** And we'll give you a honest opinion and a fair deal.

Software company requires machine code programmers for the following machines: Atari, CBM 64, BBC, Spectrum, Oric and the Electron.

Please contact Byron on 01-450 8499 after 6pm.

SAVE ZIPPY AND WIN £500 BONUS!

SPLAT

Splat! certainly makes a welcome change to the usual shoot-em-up games that flood the C&VG offices every month.

Instead of wiping out hordes of mutant invaders or destroying squadrons of bird men you've got to help Zippy, Splat's central character, to eat grass and avoid being squashed.

The game has seven levels but this review only covers the first three — mainly because I wasn't good enough to get any further!

At the beginning of every game Zippy, represented by a flashing cross, is placed in the centre of an area strewn with rocks and the occasional clump of grass. The screen scrolls randomly in four directions. Bumping into the rocks doesn't do you any harm but you have to be careful not to get crushed between a rock and the surrounding wall.

On your travels points are scored for eating grass and on the higher levels an odd plum might come your way. Zippy's progress through each level is shown as a percentage mark. When it reaches a 100 you move onto the next sheet.

The second level includes a river but remember to use the bridges because Zippy can't swim. Level three has spikes which will kill you if they are touched.

Incentive Software, the manufacturers of Splat! are offering a £500 prize to the person who can get the highest score on the game. I'm afraid you can't cheat because each score has a unique Hi-code which can be used to check the authenticity of any Hi-score.

Splat! is one of the most addictive games I have ever played on the 48k Spectrum, it is certainly the most original and at £5.50 is good value too.

THE GREAT APE BIDS FOR FREEDOM APE ESCAPE

If you have developed a liking for video game gorillas you'll be pleased to hear that the big ape has made a reappearance in a new game.

Mario fans will be disappointed though as this game has nothing whatever to do with Italian carpenters and blonde starlets.

The ape is imprisoned on the top of a

sky-scraper. Until out of the skies come a squadron of crazy choppers intent on dismantling the building brick by brick to let the beast out. Your job is to blast those choppers and stop the ape.

If he gets out he quickly runs along the ground and bashes your little man with his fist.

The game has several levels — making for a progressively difficult challenge. Level one should not cause any of our readers any problems but by the time you get to number three the action becomes fast and furious.

Added hazards are parachutists who can cripple your man if they land on him — as can falling sections of the building, crashing to the ground from obliterated choppers.

If you do bite the dust the game introduces a cute Andy Cap type character who shuffles on to the screen to sweep up the mess.

Ape Escape is the first of a new range of Vic-20 cartridges from Spectravision — the video game people — and is available from Vulcan Electronics of Hendon. It's in the shops now at a slightly pricey £19.95.

EXPLOSIONS DON'T MAKE GOOD GAMES

STAR JAMMER

Great explosions! I thought to myself, when I first sat down to play Star Jammer on the Dragon. I ended up horribly disappointed with the game.

You are presented with a starships viewscreen and various stars and objects float in front of you. Your gun-sights are situated in the middle of the screen, and the object is to manoeuvre an alien ship into range of your lasers and zap it. But you must reach the next stargate in the galaxy before your energy levels run down.

Unfortunately I couldn't identify any stargates and don't think I ever managed to reach one!

The game is a version of Atari's Star

EV·I·E·W·S

Raiders game for the VCS.

There were no instructions included with the cassette and play was largely by trial and error.

When I started the game I found it almost impossible to identify the alien as they start off as small blobs identical to all the other blobs around them.

They rapidly get larger and larger until they exploded in a spectacular and colourful fashion. I was immediately awarded 50 points for doing absolutely nothing.

With my next life I manoeuvred the alien into range of my gunsights and blasted away. I was awarded another 50 points! As the game progressed, the greater number of aliens killed meant more points were awarded for each one reduced to cosmic dust.

If the alien isn't killed before it reaches a certain size, it grows until it fills nearly half the screen and explodes. These explosions are fantastic and although the program is written in Basic I feel it's a shame that the game doesn't match up to the quality of the explosions.

The game is not helped by the impractical Dragon joystick. This doesn't have the usual self-centering feature and makes for very erratic manoeuvrability. It is available from Sussex based Salamandar software for the Dragon 32 at £7.95.

THE WAR OF WORDS WILL HOOK YOU!

WORD FEUD

Word Feud is the most entertaining word game to arrive on the C&VG reviews desk since Psion's superb Spectrum Scrabble.

Unlike Scrabble it is surprisingly simple to learn. The idea of the game is to spot the hidden word buried in a mass of letters.

Using the joystick you move a grid around the screen until you spot the word. Get the word in the frame and

press the fire button. The first person to get the word in the frame wins.

You can choose whether to have three or four letter words. There is also an option to play against the computer as well as a friend.

In the one player version your computer opponent introduces a cute little character that bounces around the screen eating up the letters and destroying your chances of finding the hidden word.

Word Feud is one of those games that take you about twenty seconds to learn but which you can end up playing for hours.

Word Feud runs on a Commodore 64 and is available from Audiogenic of Reading at £9.95.

MICRODRIVERS AIM FOR THE FASTEST LAP!

CHEQUERED FLAG

Chequered Flag is, as you might expect from the name, a Formula 1 racing simulation.

It features some spectacular graphics, and there is a choice of ten circuits, mostly based on real race tracks, although there are also some fictitious ones too — like the Cambridge Ring and Micro Drive!

When the game has loaded you first choose your track. Then you get a choice of three cars, one of which has an automatic gearbox.

The entire lower half of the screen is taken up by your car. You see all the dials — in fact it resembles the cockpit display in Psion's flight simulation program in many ways.

Apart from the car, which is superbly drawn, there is not a lot else on the screen. Small telegraph poles fly past occasionally, but there are no other cars to pass — or to crash into!

This is one of those games which you have to be an octopus to play well. The game uses ten different keys but you only need to keep your hands on the accelerator, brake, left and right.

You also need a spare finger to change up and down through the gears, except on the automatic car.

I found the game a very real simulation of driving round a track. But steering is quite tricky and you certainly notice the lack of other cars.

Chequered Flag runs on a 48k Spectrum, and you should find it in W. H. Smith. It costs £6.95.

DRACULA/LOST IN THE DARK

ADVENTURE GAMES

THE DUNGEONS K.B. 16K EXP.

Enter the realms of fantasy with this superb high resolution, multi-colour graphic adventure on the VIC 20. Battle with the fearful fire breathing Red Dragon and many other monsters to see if you can find the magic key to escape. Choose your role as Magician or Fighter. The dungeons comprise one hundred chambers. Avoid the traps, gain experience points and collect treasure provided you do not get starved in the process. You can save the adventure and solve it over months or quit and have a new adventure. Text and graphical adventure that will entertain, frustrate and reward you. £5.95

DARK DUNGEONS K.B. 16K

2nd in the series of four. Definitely NOT for the faint hearted. £5.95

ZOK'S KINGDOM K.B./J.S. 16K

In the year 2973, your starcruiser, badly damaged in a meteor storm, is forced to crash land on the planet, ruled by ZOK, a time-space generated image of Count Dracula. ZOK is evil, cunning and cruel. Your chances of rescue are nil as all the galactic patrols give this planet a wide berth. You are hungry, frightened and know that ZOK is watching and setting traps. £5.95

PHAROAH'S TOMB K.B. 16K

The Pharaoh's tomb was desecrated by the tomb robbers and now abounds with evil. Only by entering the chamber with TRIANGLE OF GOD can you remove this evil. The key to the chamber was smashed into pieces which you must find. Beware of the traps set by the ancient Egyptians to punish all those who enter the sacred tomb. £5.95

DRACULA/LOST IN THE DARK K.B. UNEXP.

Two superb graphic adventures for the unexpanded VIC. £5.95

VIC 20 16K EXP.

KRAZY KONG K.B./J.S. 16K EXP.

A very popular arcade game has been brought to life in this all machine code presentation with four screens, multi-colour graphics plus features like hi-score table. A game to enthral the whole family. £7.95

GALACTIC ABDUCTORS J.S. 16K EXP.

Experience the terrifying, relentless sound of the approach of the Cybernetic space hawks. While you try to protect yourself from the awesome contents of their pods, they feed greedily on the helpless humanoids. All machine code program that fills the whole of the screen with stunning graphics while it tests your skills to the ultimate. £7.95

3D TIME TREK J.S. 16K EXP.

A brilliant Star Trek game with a difference. Spectacular 3D graphics, real arcade action plus a game of strategy against marauding space pirates. £5.95

XENO II J.S. 16K EXP.

This all m/c game is for true arcadians with super-fast reactions and nerves of steel under pressure. The fourth screen will test you to the limit as the power source guardians bombard you while your shots are blocked by whirling suicide space ships. £7.95

SKRAMBLE J.S. 16K EXP.

An all m/c game with six sectors and similar to the 64 version. £7.95

VIC20 UNEXP GAMES

MINI KONG K.B./J.S.

Mini version of our famous Krazy Kong. Rolling barrels, lift, handbags, running score, hi-score plus expanded screen and brilliant multi-colour graphics. £5.95

SLAP DAB K.B./J.S.

A fast moving comical game involving skill and strategy. Sam, the painter man, is chased by woodworms he uncovers while painting a large area. He must now paint with skill and planning to isolate them and make frequent trips to fill up the paint pot. £5.95

FROG RUN K.B./J.S.

All m/c game inviting you to guide your frogs across a very busy highway, a grassy bank populated by snakes and then a stream full of turtles, logs and ferocious crocodiles. £5.95

DOTMAN K.B./J.S.

Ghosts chase you as you try to eat the dots. Based on the famous arcade game but with a big difference — the ghosts have been given intelligence and will try to corner you. £5.95

SPACE PEDE K.B. / J.S.

A multi screen and multi skill level game with fast and furious action. £5.95

CAVERN FIGHTER K.B./J.S.

Pilot your ship through the tortuous tunnels and caverns destroying enemy missiles, fuel dumps and airborne fire saucers. 10 skill levels. £5.95

SUDDENLY IT'S CHRISTMAS!

Christmas is probably the last thing on your minds right now. But here at the *Computer and Video Games* office we like to think ahead. That's why our next issue will be packed with festive fun and games — it is our December issue after all!

Mind you, it is a bit strange sitting in the office surrounded by decorations when people are still out sunbathing in the park! But by the time the next issue reaches you winter will have set in with a vengeance the nights will be drawing in and all you'll want to do is sit next to a cosy computer and read your favourite magazine. No, not Smash Hits stupid! *Computer and Video Games* — get it right!

What have we got for you in our astounding Christmas issue? To kick off there's a bumper bundle of prizes to be won in our grand competition extra. We've got no less than three Coleco ADAM Family Computer Systems to give away, plus Philips G7000 video games consoles, plus six copies of a brand new Snooker game from brand new software company Visions — all signed by the master of the game Steve Davis. Plus a couple of other competitions that we'll throw in at the last minute. What I mean really is that we've not had time to think about them!

We'll also be featuring a games players guide to all the new — and not so new — micro-computers. You'll be able to wave this at your parents if you are angling for a new micro this Christmas. Plus our review of the best software for each machine.

We'll also be starting a new feature on the listings we print in each issue — picking out the good points and perhaps telling you how to modify them. We'll be chatting to the authors of our games listings too and asking

them how they went about creating their games, including how they got the idea in the first place!

We are also expanding our Reviews section to give you an even better run-down on the best games around for your micro. Plus all our regular features — with an extra added festive flavour.

And there will be games listings too! We've got a 1k wonder

space with Lunar Rescue, but we come right down to earth with an odd offering for the Vic-20 called Turnip Turmoil.

We return to the arcades for our Spectrum spectacular with Brickout, one for all of you out there who own a 48k machine.

There will be some surprises along the way too — as always in the only reader friendly computer magazine . . .

This here's my newsagent

for the Sinclair ZX81 called Space Patrol, and our offering for the Atari is called Crash Landing, a game that packs a punch.

There's a maze game for Dragon owners and a war game for the Texas simply called Tank. There is a robotic feel to our Sharp game for Christmas — it's called Cyborg, and that's all we're telling you.

BBC owners can get lost in

Me'n my newsagent are real close. His name's Bill or Fred or something . . . Anyway we got an arrangement. Every month, you know what he does? He looks out my copy of *Computer & Video Games* and keeps it, just for me.

So none of the other punks on the street can get hold of my copy. And that's important to me. Mebbe its important to you too. So go n' see your newsagent with that coupon below all filled out. If he's like Harry here, you're gonna like him.

To my newsagent: Please deliver/reserve me a copy of *Computer and Video Games* every month. Price 85p.

Be Spoilt For Choice...

Why not be spoilt for choice this Christmas and avoid all the usual rush, hassle and frustration of present buying. By visiting the first Your Computer Christmas Fair (December 15-18) you can be sure of seeing a truly vast range of microcomputer products, all under one roof at the Wembley Conference Centre, the most modern and comfortable exhibition venue in the country.

Whether you're interested in choosing a micro for home management, child education or games playing, you can see everything demonstrated at the show, with all your questions answered by expert sales staff from the manufacturers, dealers and software houses. Huge amounts of software and hardware, add-ons like joysticks and printers, plus a special Sinclair Village, will be at the show.

There's never been a better way to shop for micro computer presents. So wrap up your Christmas gift worries at the Your Computer Christmas Fair.

Wembley Conference Centre December 15-18, 1983

Opening times are from 10 am to 6 pm every day except Friday - Special late night 8 pm closing.

***Inside...
New Interface 2
and ROM cartridges!
New Software!***

TAKING NEW SOFTWARE IN NEW DIRECTIONS

You'll see that this issue of Sinclair Special devotes considerable space to software. Why, when we've so much to say about hardware and peripherals? Simply because at Sinclair we believe in supporting first-class hardware with first-class software.

This month sees the start of a new commitment to education in our catalogue, both for adults and children.

In the field of micro theory, we've programs like Beyond BASIC and Make-a-Chip, which take you from the creation of simple ZX[®] assembler subsets to simulated circuit design projects.

There's Musicmaster, to teach you music terminology, note values and composition.

And if you're keen to beat your Spectrum at chess (which can be hard), you'll certainly want to try Chess Tutor 1, the first program in a complete chess masterclass.

Coming soon...

In the pipeline are many new releases, some of which break completely new ground. LOGO and micro-PROLOG for instance. They're fifth generation languages which will take you and your Spectrum closer than ever before to the creation and application of artificial intelligence.

A formal agreement between Sinclair and Macmillan Education has been announced, the first results of which will be published this autumn. These consist of five programs in a complete early reading course plus the first four of a series of programs based on Macmillan's top selling Science Horizons Scheme. All programs are designed for use in schools or the home.

And with Blackboard software, we're publishing six more home education programs for primary school children. Covering alphabet, spelling and punctuation, each of these programs is a true gem, unlike any other education software, and fascinating to run. Even for adults!

I believe that these new titles represent a major advance in educational software for the home.

New ROM software too!

You may well have heard news of ZX Interface 2[®] and ROM cartridge programs. You'll find full details of the Interface and its software on the facing page (and there's an order form on the back page too!). These offer an instant games playing facility at unbeatable prices, and expand the possibilities of using your Spectrum in yet another direction.

Alison Maguire
Applications Software Manager

SOFTWARE UPDATE

The latest cassette software for ZX[®] Computer

Chess Tutor 1

For 48K RAM Spectrum. £9.95.

Chess Tutor is a new way of learning all about chess – using your ZX Spectrum.[®]

It starts from the beginning by teaching you about the chess pieces and the way they move – including castling, en passant, promotion, check, checkmate, stalemate and perpetual check.

Then it teaches you the basic tactics – pins, forks, double attacks and skewers.

There are over 120 exercises and over 200 questions for you to answer – with demonstrations and hints from your ZX Spectrum when you want them.

You can choose which parts of the course you want – and even experienced players may be surprised at what they can learn from Chess Tutor.

Musicmaster

For 48K RAM Spectrum. £9.95.

Musicmaster turns your ZX Spectrum into a musical instrument which will not only play tunes, but will also demonstrate key signatures, durations of notes, and scales.

You can write your own tunes – in any key – play them over and over again, save them on tape, modify them.

You can either write your music on a staff, or place a simple overlay on your Spectrum for a 17-note keyboard.

Make-a-Chip

For 48K RAM Spectrum. £9.95.

Make-a-Chip teaches you the basic elements of circuit design, shows you how they fit together, and then lets you design and test your own circuits.

When you have designed a circuit, you can give it inputs and outputs and your ZX Spectrum will check it for you. Then it will run it, or tell you what's wrong so that you can modify it.

Make-a-Chip is a fascinating way of finding out how computer logic works.

Print Utilities

For 16K and 48K RAM Spectrum. £9.95.

Increase the printing and display facilities of your ZX Spectrum with the Print Utilities program.

Print Utilities enables you to enhance your programs by generating characters of eight different sizes which you can place anywhere on your screen.

Beyond BASIC

For 48K RAM Spectrum. £9.95.

Takes the agony out of assembler. Takes the mystery out of machine code.

Beyond BASIC gives you a deeper insight into the workings of your ZX Spectrum. It explains what happens inside your micro when you run a program, and it teaches you simple Z80 machine code programming.

A major feature of Beyond BASIC is that it enables you to write your own Z80 assembler programs – then you can actually see on your screen how they affect the ZX Spectrum memory and registers.

ZX INTERFACE 2®

The New ROM Cartridge/Joystick Interface

**Loads programs instantly!
Takes two joysticks!
Just plug-in and play!**

The ZX Interface 2 is the latest new peripheral for the ZX Spectrum® system. It enables you to use new ZX® ROM cartridge software: plug-in programs that load instantly. It allows you to use two standard joysticks, without the need for separate, special interfaces.

To use new ZX ROM cartridge programs, just connect Interface 2 to the rear of your Spectrum or Interface 1 and plug in the cartridge of your choice. The program is then loaded, ready to run!

You can use any joystick that has a 9-way D plug. Use one or two of them for extra fun with ZX ROM cartridge or Sinclair cassette programs – or with dozens of other Spectrum-compatible programs!

...AND BRAND NEW ROM CARTRIDGE SOFTWARE!

There's already plenty of choice of ZX ROM cartridge programs for your Spectrum. Some are old favourites, in an exciting new form. Others are new.

And now, thanks to ROM cartridge technology, you can run them *all* on a 16K RAM Spectrum, even if they were originally written only for 48K machines!

Every ROM cartridge program loads fast and faultlessly. No wires, no waiting, no worries about loading errors! All of them are affordably priced too, at £14.95.

New! PSSST

Robbie the Robot sits in his garden. Help him fetch compost to cultivate his prize Thyrgodian Megga Chrysanthodil. Help

him make the right choice of pesticide, to ward off devilish insects. Stop the insects breeding to overwhelming numbers before Robbie's plant has bloomed. PSSST is horticulture with a horrendous twist!

One and two player option, with a host of features including sound effects.

New! Tranz Am

Set in a future time ruled by cars and trophies, in a land where petrol replaces gold, and status is possession

of the 8 Great Cups of Ultimate.

Driving your Super Blown Red Racer, use your skill to outwit and crash the Deadly Black Turbos. Use your instruments to locate and collect the trophies – before you overheat or run out of fuel.

A program with outstanding multi-directional movement, graphic features, and a playing area equivalent to more than 600 times actual screen area.

Chess

This sophisticated program does everything you'd expect at board game level, and much more besides.

The high-resolution chess-board and pieces are arranged in a row and column system, so it's easy to key in your moves.

At any stage of the game you can request the computer to suggest a move, reverse roles or change the level of skill.

Full-colour high-resolution graphics.

Horace and the Spiders

Guide Horace on the hazardous journey to the cobwebbed house full of poisonous spiders.

Safely in the house, you must move along cobwebs, choose a spot... and jump on it! The spiders will be in a frenzy – scuttling to repair their precious web.

And when a spider is spinning a new section, you're safe to attack and destroy it!

Kill all the spiders, and a new web appears... with even more spiders to catch.

Full-colour high-resolution graphics.

Backgammon

Everything you need to play the famous and deceptively simple board game. Board, stones, rolling dice and doubling dice are shown in full colour and high resolution. Choose from four levels of skill to suit experts and beginners alike – full rules are included.

Planetoids

Dodge and swerve using your thrust button, turn on a planetoid... fire! But beware – the alien ship moves

fast to destroy you with cluster bombs. And when it comes to the crunch, use your hyperspace button!

Full-colour high-resolution graphics with sound.

New! Cookie

You're Charlie the Chef, who keeps his ingredients locked in the larder. But if the ingredients escape, they

bring the inedible Nasties with them!

You must daze the escaping ingredients with flour bombs, and knock them into the mixing bowl. Stop them getting into the dustbin, at all costs! And beware of Nasties that get into the mixing bowl!

Cookie is fast-moving panic in the pantry, with a cast of real characters. A program to make you smile – and sweat!

Space Raiders

Your skill is all that's stopping successive waves of aliens from destroying Earth. Use your gun base

to attack. Shelter behind buildings... move out and blast the passing alien soaceship!

Full-colour high-resolution graphics with sound.

Hungry Horace

Horace is forever being chased around the park by guards. He steals their

lunch, eats path-

way flowers and creates chaos in the park by ringing the alarm!

You'll have to be quick to keep Horace out of trouble!

Full-colour high-resolution graphics with sound.

New! Jet Pac

As Chief Test Pilot of the Acme Interstellar Transport Company, your task is to deliver and assemble spaceship

kits. On your way round the galaxy, you're free to collect precious stones and gold.

The catch? Rocket fuel is precious and scarce. And the aliens don't take kindly to the theft of their valuables. You'll need your wits and your lasers!

With a host of features, including multi-directional movement, explosions, sound effects and one and two player option.

ZX MICRODRIVE

NOW ON RELEASE

The ZX Microdrive® System – as you'd expect from Sinclair – is unique to the world of computing. It's a compact, expandable add-on system which provides high-speed access to massive data storage. With just one Microdrive alone (and Interface 1), you'll have at least 85K bytes of storage, the ability to LOAD and SAVE in mere seconds, the beginnings of a local area network of up to 64 Spectrums, and a built-in RS232 interface! The cost? Less than £50 for each Microdrive.

How to get ZX Microdrive
Spectrum owners who bought direct from us, by mail order, have been

sent full details. Order forms are being mailed in strict rotation, so if you haven't yet received your order form please bear with us. We're making good progress in meeting the huge demand.

If you didn't buy your Spectrum by mail order, don't worry. Send us the form from the bottom of this page. We'll add your name to the mailing list, and send you details by return.

Each Microdrive costs £49.95. Interface 1 costs £49.95, but just £29.95 if purchased with a ZX Microdrive. Extra ZX Microdrive cartridges: £4.95.

How to order

Simply fill in the relevant sections on the order form below. Note that there is no postage or packing to pay on some purchases. Orders may be sent FREEPOST (no stamp needed). Credit card holders may order by phone, calling 01-200 0200, 24 hours a day. 14-day money-back option, of course. Please allow 28 days for delivery.

® ZX, ZX Spectrum, ZX Interface and ZX Microdrive are all registered trade marks of Sinclair Research Ltd.

ZX Microdrive information request

Please add my name to the Microdrive Mailing List, and send me a colour brochure with full specifications of ZX Microdrive/Interface 1 ☐ (tick here). You can use the above form to send us your name and address.

C & VG SOFTWARE FORM

Have you written a games program which you feel is just right for C&VG? If so we have come up with a form to ensure that we can test it out and give you our views on it, as quickly as possible.

We would prefer a tape and listing but can work from just a tape and will return it to you if it doesn't find its way into the magazine. We will also need an additional sheet explaining the game and its theme. And any documentation like lists of variables or how certain routines are working, would be of great help to beginners. Please make sure that your name, address and the program name is on everything

you send us, including the cassette itself.

This form will merely help us to keep a check on your game as it goes through our testing process and make sure we have all the information we need to present it properly in the magazine.

If you don't want to cut up the magazine, we will accept photocopies or close copies of this page. This form will be appearing regularly in C&VG issues from now on.

Remember we pay £10 for each listing published and you could win our Programmer of the Year Contest where we will try to turn the winner into a best-selling games author.

BRAIN DAMAGE

on off

You'll have a REAL fight on your hands when you tackle our new games.

They're all-action games designed to push your senses to new limits. Take "Brain Damage"; trapped in your computer's micro-circuits you'll need all your resources to defeat the CPU's electron panzers ... and if they don't get you, the Rogue Programs will.

When you get your breath back you'll be running for your life again in "Exterminator". Transported into the future you'll find that earth is a very different place. Robots rule the world and the human race is almost extinct, there's only one family left. You have to save them ... but hurry you don't have much time.

Sitting in defense command, your hands poised at the controls, you scan the sky for activity knowing that it will shortly erupt. "Armageddon" is about to begin ... only YOU can save the last six cities.

If you're still in control of your senses you can try your hand at rescuing the miners trapped on Titan ... easy you think! Ride your ship through the mini-meteor storm and pick up the men. But you didn't reckon on the corporation spaceships making this "Mission Impossible".

Book your test flight today. Buy any of Silversoft's new games and find out if you're really in control.

The chart-hitting

Mad Martha

Poor little Henry is the hen-pecked hero of this domestic tale. One night Henry can take no more. He steals his wages from his wife's purse, and sneaks out of the house being careful not to wake the baby or trip over the cat, and heads for the bright lights to have some fun. Trouble is he runs out of money. His only way to raise some cash is to gamble his few remaining pounds on the spinning wheel of the roulette table. Just as Henry is getting in to his evening at the tables his wife - Mad Martha - has noticed his absence. Realising Henry has absconded with the housekeeping she sets out after him with an axe. Guess what part you play in this happy tale? That's right, you're Henry. Watch out for that axe!

FOR 48K SPECTRUM ONLY £6.95

Post & Packing 40p

A game to invest in... funny, genuinely original, and the graphics are great... hit the key to begin, the Spectrum plays a real Hollywood-style movie theme tune, and the hunt is on!

Personal Computer News

Marvellous adventure, really dotty... a refreshing change from some of the doomladen programs encountered nowadays... a game where you won't get to the next stage without solving the present conundrum.

Popular Computing Weekly

And now -

Mad Martha II

Time for the annual holiday and Martha decides to visit her half-cousin Manuel, who is a waiter in a plush hotel in Barcelona. One afternoon, Martha sets out on a bus tour with her son, young Arbuthnot, leaving orders for Manuel to keep an eye on Henry. Unbeknown to Martha, crafty Henry has a Spanish pen-pal, and has planned a secret rendezvous. Henry leaves the hotel, brimming with enthusiasm and Manuel (who is totally wacky!) is hot on his trail. The adventure takes us through the thrills and spills of a madcap chase, taking in amongst other delights, a bull fight in which poor Henry is forced to play the leading role. Guaranteed laughs and fun for all the family!

- ★ Full adventure format - accepts multiple commands at one entry, in plain English
- ★ Witty, intelligent replies to commands
- ★ Skill level select for beginners
- ★ Every location in full screen, high-res, colour graphics
- ★ Three exciting arcade-type games as an integral part of the adventure
- ★ Full help facility and save game command

Can you face 1984 without our Yearbook?

The C&VG delivery is a real event in this outpost of the galaxy. It only arrives every other millennia when the comet goes past. But this little alien isn't going to miss out, he's just put in an order for *The Computer & Video Games Yearbook 1984*.

There's enough in it to keep him going for a couple of millennia. He'll be playing the four specially commissioned games, converted across a range of micros.

● He's going to struggle through *The Vespozian Affair*, an adventure set on a research space craft, flying between the planets.

● He and his alien friend may come to blows when playing *The Beacon Star War*. ● Those long fingers may be a handicap when he plays *Pi-Polyps* an

arcade style game set on a planet surface as a research station down the valuable polyps before the pirates carry them away. can he trust when he plays *Interstellar Intrigue*, a game of plomacy for up to five players. ● He'll be laughing at a whole

tries to track
● Who
strategy and di-
load of new Bugs
cartoons, Puzzling with Trevor Truran, improving his games writing skills and learning about arcade and video games in a whole range of sparkling features... No wonder there's a glint in his eye!

ON SALE NOW! PRICE £2.25

DIAND

SOFTWARE FOR THE DRAGON

SNAKEBITE (by David Elliott). A colourful, tuneful and gripping keyboard oriented game. Your snake grows longer by eating numbers, so watch out for obstacles and sharp turns while manoeuvring it, or it will die! Seven screens of increasing difficulty. Can you reach the seventh screen? We haven't yet!
Cassette tape £7.95

SKETCH-A-PUZZLE (by David Elliott). Your computer sketch pad enabling you to draw and 'paint' four-colour pictures AND there's a twist! Turn your picture into a sliding block puzzle. Shuffle the blocks, then use your skill to re-arrange them into the correct positions, NOT EASY!! Save your pictures on tape for future use. 5 pictures included with the program for the less artistic. Hours of creative fun!
Cassette tape £7.95

CAT 'N' MOUSE AND SPACE MAZE (By David Elliott). Terrific value, two exciting maze games on one tape!
CAT 'N' MOUSE. Don't let the cat get you! Confuse it by darting through one of the randomly placed mouseholes!
SPACE MAZE. Featured in 3D. You find yourself in a vast Labyrinth on the planet ZYGON. Can you find your way out?
Cassette tape £7.95

SOFTWARE FOR THE ORIC

SPACE INVADERS (by Andrew and Roger Thomas). A super version of the traditional arcade game, highlighting the graphic capabilities of the ORIC computer. Can you exterminate the aliens before they land? 4 levels of skill
Cassette tape £5.95

"Software"

"Cleverware"

Is your ZX Spectrum making the most of your child's intelligence?

Will your child be taking an 'O' level in Space Invaders? Of course not. That's why Heinemann have introduced a range of computer games specially designed to help your child's future.

They're both educational and fun, because as all good teachers will tell you children learn more effectively when they are having fun.

So the beauty of it is, your child will think he's mastering a new game. But you know he's really improving his Maths, or English, or Geography or any one of a range of skills and subjects.

Heinemann have for many years been publishing the books your children are using at school.

Now Heinemann are bringing the same expertise and experience to the development of educational computer games for your children to use at home.

With each of these special educational games, designed for 8-12 year olds, you don't just receive a computer program on a cassette. You also get an absorbing, fully illustrated, 16 page book which is packed with facts and information which extends the program and provides ideas for further exciting and educational activities.

The four programs are:

SPECIAL AGENT

As you chase the enemy agent around Europe, you will need to consult travel timetables, respond to intelligence reports, some in code even, and plan your international route. With only a limited amount of money to spend in tracking him down, careful budgeting and a knowledge of Europe are quickly learnt.

BALLOONING
You are flying high above an unknown landscape in a hot air balloon. Will you have enough fuel to climb over the mountain?

Can you master the principles (and physics) of lighter-than-air flight and land safely, avoiding the hazards? Enjoy exploring the science of such flight as you learn to fly the balloon on a series of adventures.

CAR JOURNEY
How quickly could you drive from Exeter to Glasgow, without getting caught for speeding and without running out of petrol? What is the best route from Dover to Liverpool and how much petrol will you need? Could you manage the necessary calculations and decisions to run a successful delivery service? Travel the roads of Britain and enjoy finding out!

PUNCTUATION PETE
Your program to make the acquisition and practice of language skills a real joy! 'Pete' is your guide through a carefully structured series of passages which need punctuating.

Available direct from Heinemann Educational Books, FREEPOST, 22 Bedford Square, London WC1 3BR at only £9.95 including postage and VAT.

Also available from Boots, Dixons, Menzies, W. H. Smiths and other leading retailers. These games will bring a new and worthwhile dimension to your home computer.

NB Run only on 48K Spectrums.

HEINEMANN FIVE WAYS SOFTWARE

To: Heinemann Educational Books, FREEPOST, 22 Bedford Square, London WC1 3BR. (No stamp needed).

Yes I would like to improve my child's education. Please send me the program(s) indicated at £9.95 each inc. VAT & postage.

PRISM NLX 2000

offers the most se under the Spet

™ Prestel and the Prestel symbol are trademarks of British Telecommunications.
*Subscribers are responsible for quarterly Micronet 800 and Prestel subscription charges.

Micronet 800. The spectacular service that gives micro-users access to a huge database of information, hundreds of software programs, and communication with other users.

Sinclair ZX Spectrum. The home computer that's out-shone all its rivals.

Bring the two together and it's a combination that opens up a breathtaking new world of microcomputing possibilities.

Suitable for either the 16K or 48K versions, the Prism VTX 5000 modem was designed specifically for the Spectrum and fits neatly under the micro.

Plug the other end into the outside world via your telephone and your system will give you more than you ever dreamed possible.

Micronet 800 is fun, friendly and inexpensive to run. Choose from hundreds of free games, download and use them on your Spectrum whenever you like, play on-screen games (as easy – and inexpensive – as a local phone call), and compete in Big Prize games and quizzes. There's also a range of downloadable games you can buy for less than over-the-counter prices.

Learn through up-to-date education packages, and help run the household with simple business packages.

And if you need fast facts about the world of computers, Micronet 800 provides constantly up-dated product comparisons, reviews, prices, dealership and 'best-buy' information – 24-hours a day, 7-days a week.

You can access over 250,000 pages of Prestel™ information covering news, travel, holidays and entertainment, together with an electronic booking service.

Keep in touch – you can send electronic mail to any other Micronet 800 or Prestel user.

The VTX 5000 provides a full Prestel screen with graphics, and an off-line message composition facility for speedy transmission when you go on-line.

You can use the Sinclair printer to print frames and messages, or save them on tape for future use.

All this – and even more as the service grows – retails at the low price of £99.95 inc VAT.

Plus, as a special offer to early users, we will provide you with a jack-socket installation (should you need one) completely free of charge.

So don't delay – send the coupon today.

One of the many faces on Prestel

The response from our first advert was so great that we just had to advertise some of our other games

Can you steer your Silly Cyclops through the Barrier and then through five other mind-boggling games? Only one thing you can be sure of, it's going to be Practically Impossible. In some of the games Silly Cyclops closes his eye so you can't even see him. How on earth do you help a guy when you can't see him? As I've said, it's Practically Impossible...

— For any ZX Spectrum

mower mania

— You are employed by a miser millionaire as a gardener, who only provides you with an old lawn mower, on which the throttle has stuck open. You must try and mow the lawn avoiding crashing into the Gnomes, Garden Chairs, Tree, Pond, Fence and at all cost avoid the vegetable garden, as the millionaire has sprayed it with a harmful insecticide which has had strange effects on the rabbits... Phew! What a job...

— For the VIC 8k Expanded

— You built the bridge and the responsibility is all yours. As bridges go it's not a bad job. Only one snag, due to a shortage of building materials there is only one section left and six gaps to fill. The Boss is on his way to inspect the job, can you juggle the single section around quickly enough so that he won't notice the gaps? It ain't going to be easy.

— For the Commodore VIC-20

ALTAIR 4

— To avoid an asteroid storm your star-cruiser was forced to make an emergency landing on the planet Altair 4. You have to make some makeshift repairs before take off. Altair 4 is an inhospitable planet, it has no atmosphere and countless galactic travellers have met their fate here. One or two creatures inhabit the planet and they don't like humans... except to eat...

— An adventure for the Commodore 64

— Now you can stretch your skills to the limit with this new computer version of the highly popular game Connect 4. Pit your wits and skill against the computer and simply connect four of your counters in a row, either vertically, horizontally or diagonally... did I say simply?

— For the Lynx

MEGA VAULT

— Poor Fred! Locked away in the vault with no food... can you help? Collect the food and make your way to the key and back to release poor Fred... easy, but what about the guardians and traps that are lurking in the Mega Vault that are intent on stopping you...

— For the Commodore VIC-20

Any of these games for just

CRAZY CAVE MAN - Journey back to prehistoric times! A tribe of cave dwellers sends out a hunting party, but the men are scattered when they are ambushed by a huge sabre-toothed tiger! You are one of these hunters: separated from your companions and a long way from shelter, you begin the hazardous trek home. On the way there are many dangers, like ROLLING ROCKS, DINOSAURS, DODOS AND PREHISTORIC BIRDS.

For the

BLUE MOON - You are the pilot of an intergalactic spacecraft. Your mission is to rescue a sister-ship and her crew who are trapped on a hostile planet and to return with them to the safety of the Blue Moon. However, journeying across the vastness of space there are many hazards to negotiate, such as the deadly BLUE BOUNCERS, COMETS, BELL BIRDS, DROIDS and TECOM ALIENS.

Please make cheques payable to: MERLIN SOFTWARE

BLUE MOON

CRAZY CAVE MAN

GAMES MACHINE LTD.

2 new original Commodore 64 games at £7.95 each, fully inclusive.

EGBERT — A FAST ARCADE GAME 100% machine code. Egbert was on the production line at **LEYSACE**. It was a comfortable life until the invasion of the **TEBBITES** from the planet **TOR**. Egbert's union has been exterminated and the Tebbites have left their deadly **PETS** running wild in the work place.

As if that wasn't enough, the evil invaders have forced Egbert to take care of an egg — damaging the egg will have fatal consequences for poor Egbert.

Egbert is now on piecework — can he earn a decent wage? Can he even survive? You may get an ulcer by playing this game. Requires joystick import 2.

THE FABULOUS WONDER & THE SECRET OF LIFE, THE UNIVERSE AND EVERYTHING.

An adult fantasy game with arcade action.

You are travelling far from home looking for good times around the Universe, when you are intercepted by the evil Brutus of the Federation. Brutus forces you to go and seek the Secret of Life, the Universe and Everything — known only to the Fabulous Wonder, a hostess in the Space-Out Inn in Highsville on the planet **Copus**. You are teleported down to Highsville where the Customs Man demands money for Teleport Tax.

There is a video game in the Terminal with 3 credits left. Now you are on your own and you must decide how to proceed to Highsville Main Street to find the various establishments to enter . . .

New original 48k Spectrum at £5.95 incl.

BARREL DROP — ARCADE ACTION AND FUN FOR ALL THE FAMILY.

Poor Gordon! His drainpipes are blocked again and the only way to clear them is to drop barrels down them. Gordon stands on the top of his roof with five barrels. When the game starts he'll roll one down the roof. Press SPACE to drop it through the roof accurately into the centre of a drainpipe and you'll score a number of points in the pipe which will start to flash and Gordon will get the barrel back for another go. The barrel will be lost if the drop is inaccurate or enters a pipe already filled. But — Flash the dog! If you know you're going to lose the barrel and you can see Flash peeping out from the bottom right hand corner, press D and Flash will save you! Once you clean all 5 pipes, you will get a bonus, but there's a surprise in store before you get to the next set of pipes to fill . . .

Add 50p P&P.

Send cheques/PO or Access/Visa card no. together with name and address and titles required to:

DAVID BRAYBROOK. TEL: (0438) 316561

LOTHLORIEN

WARMASTER SERIES

THE WINNING NAME IN WAR GAMES

3 NEW STRATEGY GAMES FROM THE FAMOUS WARMASTER SERIES

Johnny Reb (1861)

There's still plenty of fight left in the Confederate South as each side selects forces to manoeuvre on a full-graphics battle field. Use the 'save game' facility to perfect your tactics and re-write American History. 1 or 2 players.

Johnny Reb

Spectrum 48K (£5.50)

NOW AT LAST for BBC-B and Oric 48K (£6.95) this best-selling game. COMING SOON—Dragon 32K version.

MORE SUPERB STRATEGY GAMES FROM LOTHLORIEN

GOT A FEW LIGHT YEARS TO KILL?

You are going to need all the light years you can muster if you are to conquer the latest mindwarping cartridges from Imagic. For instance there's

SOLAR STORM

Fragments from an exploded sun shower your planet. Alien spacecraft bombard you. Pulverize them or your planet will overheat and blow up!

FATHOM

As a seagull, flap your wings and fly for shore. Touch the clouds and they'll disappear! But beware of blackbirds. Search the shoreline, but don't get seared by the volcanoes.

MOONSWEEPER

Miners are trapped on Jupiter's moons — U.S.S. Moonsweeper to the rescue! Meteors hurtle past. Choose a moon and land if you can — or dare.

LASER GATES

It's bad news. Computers have taken over the earth, you've got to stop them! Battle with their Lasers, rock hurling aliens, and flying demons.

QUICK STEP

Become a Kangaroo in this latest wild and wacky game. Bounce from trampoline to trampoline in pursuit of points, but you'd better hop to it.

These cartridges will tie you in hyperspatial knots. Beam down to your local video game stockist and check out these exciting new titles but be warned, you could be playing from here to eternity.

Imagic Distribution Centre, P.O. Box 33,
Harrowbrook Road, Hinckley, Leicester.
